Government of Russia

4 days ago

Government Activity: Key events and decisions of the week – a digest:

Over 13,000 families across 56 regions will be able to connect their homes to gas networks and receive the necessary equipment. The Government is allocating an additional 1.2 billion rubles to the social gasification program. This support is intended for large families, participants in the Special Military Operation and their families, persons with Group I disabilities, low-income individuals, and those caring for children with health limitations.

The coal industry is set to develop based on new technological foundations. The Government has updated the industry development program through 2050. It entails the introduction of modern equipment, unmanned technologies, and digital platforms; the development of new deposits; the expansion of coal chemistry and deep processing; and improved workplace safety. Plans are in place to increase coal production by 50% by 2050.

The Government has approved the draft federal budget for 2027–2029. Fulfilling social obligations remains a key priority. Funds have been allocated to support families with children and to develop healthcare and education. Special attention will be paid to achieving national goals, including securing technological leadership. Support for the regions will be maintained at 2026 levels.

KUMA FOLD

More opportunities will open up in Russia for professionals working in film, music, design, and other creative sectors. The government has approved a strategy for the development of the creative economy through 2036. Specialized venues, development institutions, and creative clusters will be established across the regions. Practical training, internships, and professional development programs for specialists will be expanded. Copyright protections will also be strengthened to more effectively combat the unauthorized use of others' works. Russian animation studios will receive additional support, with their corporate income tax rate reduced to 3%. We anticipate seeing more high-quality Russian films for family audiences in cinemas, on television, and on online platforms. Launching new production ventures and attracting investment will become easier in Russia. Mikhail Mishustin held a strategic session on improving the country's business climate. The primary mechanism for boosting investment appeal is the national model of target conditions for doing business; this model helps create a favorable business environment and reduces administrative barriers. Launching a new investment cycle remains a key priority. To achieve this, we must continue to create convenient, predictable conditions for investors, taking into account the requests of entrepreneurs, the needs of our regions, and the interests of the country as a whole. Traveling around Crimea will become more convenient. A road connecting the Tavrida federal highway to Crimea's southern coast is being reconstructed on the peninsula, with 3.5 billion rubles allocated for the project. The route will pass through Simferopol, Alushta, and Yalta. This decision will improve transport connectivity between Crimean towns and villages while offering tourists more comfortable travel options across the peninsula. The New Year holidays will last 11 days; Russians will have time off from December 31 to January 10. Mikhail Mishustin has signed a decree regarding public holidays and days off in 2027. In February, there will be three consecutive days off from the 21st to the 23rd. In March, the break runs from the 6th to the 8th. The May holidays will total six days, split into two periods: May 1-3 and May 8-10. Another three-day break will occur in June, from the 12th to the 14th. In November, there will be four days off, from the 4th to the 7th.

Mali Presidency

On September 18, 2026, the Malian Council of Ministers, chaired by General Assimi Goïta, approved:

The draft 2027 budget: an increase in both revenue and expenditure, alongside a slight reduction in the deficit.

A national prison policy (2026–2030).

Appointments across several ministries.

Announcements: a forum for diaspora youth in the Americas, a digital platform for their expertise, participation in an Islamic Development Bank meeting,

and the launch of the Month of Solidarity, accompanied by a warning regarding dengue fever.

Latest French Foreign Affairs Updates

Key facts in brief (as of September 15, 2026):

Finland has officially joined the advanced French nuclear deterrence initiative (becoming the 10th participating nation).

The initiative aims to strengthen European deterrence without replacing NATO and without deploying nuclear weapons in Finland during peacetime.

A meeting between President Macron and Canadian Prime Minister Mark Carney is scheduled for September 20 in Saint-Pierre and Miquelon to boost cooperation in energy, defense, and critical minerals, while emphasizing national sovereignty.

France has officially apologized for a post criticizing the U.S. human rights record in order to lift the hold on the appointment of its new ambassador to Washington.

Continued support for Ukraine, condemnation of Russian provocations in the Baltic Sea, and measures targeting products from Israeli settlements.

These are the key verified facts regarding current French foreign policy.

KUMA FɔLD

A brief summary of the most important foreign news stories about France (until September 5, 2026):

South Korean visit: South Korean President Lee Jae-myung will visit France (September 6-9) for a summit with Macron and a joint film summit, to strengthen the strategic partnership in security, technology, and the economy.

Security Council presidency: France will assume the presidency of the UN Security Council throughout September 2026.

Relations with Britain: Cooperation will be strengthened through the Bayeux Textile Exhibition, while tensions persist over irregular migration across the Channel.

Other issues: Macron's discussions with NATO regarding Ukraine, France's insistence on its claims to Pacific islands in the face of Vanuatu, and past tensions with Iran and Algeria over colonialism.

These are the most important foreign news stories at the moment in brief.

KUMA Fɔɔɔ

A brief and realistic summary of the latest US foreign news (September 5, 2026):

Iran: The conflict continues intermittently.

Trump downplays it, calling it "a minor issue," while the cost has exceeded \$37.5 billion and 18 American lives.

Gasoline prices in the US have reached record highs due to the tensions.

Venezuela: A major US oil deal with the government there is criticized by the Venezuelan opposition for delaying any democratic transition.

Ukraine: US envoys are in Moscow with a peace proposal, including a temporary aerial truce during the visit.

These are the most prominent foreign developments currently; the rest are domestic or related to the elections.

Latest French Foreign News

In Brief (Latest French Foreign News as of August 25, 2026):

Mohammed bin Salman's Visit to Paris (August 23-24):

Meeting with Macron, the first meeting of the Strategic Partnership Council, defense and investment agreements (including €6 billion for theme parks), and joint calls for a diplomatic solution with Iran, a ceasefire in Gaza, and support for the stability of Lebanon and Syria.

Tensions with Iran: France expelled Iranian diplomats in response to an attack on French diplomats in Tehran.

Support for Ukraine: Macron promised to send interceptor missiles after a new Russian attack.

Coordination with Egypt: A call between the two foreign ministers affirmed support for Syria's sovereignty and stability.

These are the most important and immediate points.

Latest US Foreign News

In brief (the current situation):

The US launched a massive economic sanctions campaign against Iran today, dubbed "Operation Paragon," aimed at completely crippling the Iranian economy and cutting off all its sources of funding (oil, gold, shipping, cryptocurrencies, etc.).

US tariffs of 50% on approximately \$20 billion worth of Canadian goods went into effect after negotiations failed, and Canada retaliated in kind.

These are the two main US foreign news stories right now.

Russian Government

16 ago at 6:03 PM

Government Work. Key Events and Decisions of the Week in the Digest:

Mikhail Mishustin took part in the All-Russian Forum "Development of Small Towns and Historic Settlements." At the plenary session, the Prime Minister noted that approximately 120,000 areas have been improved during the implementation of the federal project "Creating a Comfortable Urban Environment." Mikhail Mishustin also toured the forum's exhibition, which showcased improvement projects in new and border regions.

The free economic zone regime has been expanded to cover the entire Belgorod, Bryansk, and Kursk regions. Entrepreneurs will be able to implement investment projects in the manufacturing and agricultural sectors on preferential terms.

The government approved the plan for implementing the Far East Demographic Policy Strategy until 2030. Residents will continue to benefit from preferential mortgage programs, payments for the birth of their first child, and regional maternity capital for the birth of a second child. In order to attract workers to remote areas, the programs "Zemsky Doctor," "Zemsky Paramedic," "Zemsky Teacher," "Zemsky Cultural Worker," and "Zemsky Trainer" will also be continued.

Russian Government

16 ago at 6:03 PM

Government Work. Key Events and Decisions of the Week in the Digest:

Mikhail Mishustin took part in the All-Russian Forum "Development of Small Towns and Historic Settlements." At the plenary session, the Prime Minister noted that approximately 120,000 areas have been improved during the implementation of the federal project "Creating a Comfortable Urban Environment." Mikhail Mishustin also toured the forum's exhibition, which showcased improvement projects in new and border regions.

The free economic zone regime has been expanded to cover the entire Belgorod, Bryansk, and Kursk regions. Entrepreneurs will be able to implement investment projects in the manufacturing and agricultural sectors on preferential terms.

The government approved the plan for implementing the Far East Demographic Policy Strategy until 2030. Residents will continue to benefit from preferential mortgage programs, payments for the birth of their first child, and regional maternity capital for the birth of a second child. In order to attract workers to remote areas, the programs "Zemsky Doctor," "Zemsky Paramedic," "Zemsky Teacher," "Zemsky Cultural Worker," and "Zemsky Trainer" will also be continued.

KUMA FOLɔ

À Kayes, à l'occasion de la Journée internationale de la jeunesse, un jeune jardinier, Abdoulaye N'Diaye dit Raba, a reçu un important appui en matériels et intrants agricoles pour développer son activité et renforcer son autonomie économique. Une initiative portée par Madame Fatoumata Batouly Niane et son représentant Daouda Camara en faveur de l'entrepreneuriat des jeunes.

KUMA Fɔɔɔ

This looks like Python code for Bambara text-to-speech synthesis — but this is Glide, a platform for building web apps and internal tools, not a Python/ML execution environment.

I can't run Python scripts, load PyTorch models, or generate audio files here.

What you might be looking for:

To run this code — you'd need a local Python environment or a cloud notebook (Google Colab, Kaggle, Hugging Face Spaces) with GPU support.

To build a web app around Bambara TTS — I could help you build a Glide app that calls a deployed TTS API endpoint (e.g. one you host on Hugging Face Spaces or Replicate), with a text input and audio playback.

Would either of those directions be usefu

BAMANANKAN NA

Nin bɛ i n'a fɔ Python kode min bɛ bamanankan sɛbenni-ni-kumasenw sinsin — nka nin ye Glide ye, n'o ye ɛntɛrɛneti porogaramuw ni kɔɔna baarakeminɛnw jɔli yɔɔ ye, a tɛ Python/ML waleyali sigida ye.

N tɛ se ka Python sɛbenniwa baara, ka PyTorch modeliw doni, walima ka odio filew dilan yan.

KUMA FɔLD

Михаил Мишустин завершил рабочую поездку по регионам Дальнего Востока и Сибири. В Горно-Алтайске председатель правительства провел совещание по развитию туризма и индустрии гостеприимства. За первую половину этого года туристы совершили более 43 миллионов поездок по России.

Более 3 миллионов поездок пришлось на гостей из других государств. Правительство продолжает поддерживать развитие туристической отрасли. Работает программа льготного кредитования для строительства гостиниц, горнолыжных трасс и парков развлечений.

На ближайшие два года предусмотрено по 9 миллиардов рублей на развитие туризма в регионах. проведение фестивалей, благоустройство исторических центров городов, создание туристических маршрутов. По итогам совещания Михаил Мишустин обозначил основные направления развития туристической индустрии.

Среди них—развитие экологического, детского и молодежного туризма. Отдельная задача—обеспечить школьникам и студентам комфортный отдых во время каникул. На летний оздоровительный отдых в Краснодарском крае для детей участников СВО, а также для детей из многодетных семей направлено 3 миллиарда рублей.

Правительство также продолжит поддерживать туристическую отрасль в Крыму, где в этом году пришлось приостановить прием отдыхающих. Уже направлено более 4 миллиардов рублей, чтобы предприятия в сфере туризма смогли сохранить коллективы и продолжить работу.

Развивая туризм в нашей стране, всегда надо опираться на запросы граждан, учитывать мнение представителей отрасли, чтобы дальше раскрывать, я бы сказал, необъятный потенциал наших российских регионов.

На встрече с главой республики Алтай Андреем Турчином Михаил Мишустин обсудил также социально-экономическое развитие региона. В Челпонате состоялось заседание Евразийского межправительственного совета. Перед началом расширенного заседания главы делегации встретились с президентом Киргизии Садыром Жапаровым. В ходе заседания межправкомиссии главы правительств стран-участниц ЕАЭС рассмотрели ключевые направления развития интеграционного взаимодействия.

Несмотря на глобальные вызовы, макроэкономические показатели ЕАЭС демонстрируют положительную динамику. В январе-май вырос реальный ВВП. Также рост показывают промышленное и сельскохозяйственное производства, взаимная торговля.

Вместе мы работаем, чтобы в полной мере реализовать потенциал каждого участника интеграции для повышения качества жизни наших граждан.

Уверен, что самодостаточность Союза и взаимодополнение наших экономик позволит этого добиться.

По итогам заседания был принят ряд решений.

Страны ЕС будут взаимно признавать ученые звания.

Расширяется также инвестиционное сотрудничество.

Брокеры из государств Евразийского экономического союза смогут участвовать в торгах на биржах всех стран «пятерки».

Для электронной торговли товарами на внутреннем рынке ЕЭС установят единые и прозрачные правила.

Гражданам станет доступен более широкий ассортимент продукции на маркетплейсах и электронных торговых площадках.

Правительство России

Le 9 août à 18:05

Работа Правительства. Главные события и решения недели – в дайджесте:

Михаил Мишустин завершил рабочую поездку по регионам Дальнего Востока и Сибири в Республике Алтай. В Горно-Алтайске Председатель Правительства провел совещание по развитию туризма и индустрии гостеприимства, на котором обозначил основные направления развития отрасли. Также Михаил Мишустин встретился с главой республики Андреем Турчаком и обсудил социально-экономическое развитие региона.

В Чолпон-Ате состоялось заседание Евразийского межправительственного совета. Перед началом расширенного заседания главы делегации встретились с Президентом Киргизии Садыром Жапаровым. В ходе заседания межправкомиссии главы правительств стран – участниц ЕАЭС рассмотрели ключевые направления развития интеграционного взаимодействия. По итогам заседания были подписаны соглашения о взаимном признании документов об ученых званиях, допуске брокеров к торгам на биржах всех стран «пятерки», электронной торговле товарами на внутреннем союзном рынке.

BAMANANKAN NA

Irisi jamana ka gɗɗereṇaman

Le 9 août à 18h05 Bamako, Mali

Gofereṇaman ka baara. Dogɗkun ƙonɗobaw ni latigew be ɗoɗo digest ƙonɗo:

Mikhail Mishustin ye baara taama ɗo dafa ka taa ƙonɗofela yɔɔɗan ani Siberi maraw la Altai jamana na. Gorno-Altaisk dugu ƙonɗo, gɗɗereṇaman ɗemɗɗo ye laje ɗo ke turisimu yiriwaliko ni jatigila baara yiriwali kan, a ye siraba minnu jira o baara yiriwali

siratige la. Mikhail Mishustin fana ye כִּכְכּוֹת ni jamanakuntigi Andrei Turchak ye, ka baro ke o mara in ka כִּכְכּוֹת ni sigida yiriwali kan.

Latest Chinese Presidential News

In Brief (as of August 11, 2026):

Xi Jinping's expected visit to the US in September (around 24) in response to Trump's visit to Beijing in May, with trade talks ongoing.

Summer Beidaihe meetings are underway for internal coordination.

The Politburo meeting in late July set economic priorities for the second half of the year, and the full Party session will be held in October.

The anti-corruption campaign in the military continues,
and China supports Brazil at the WTO.

Preparations are underway for the Shanghai Cooperation Organisation summit in Bishkek at the end of August.

Latest news from the French presidency (Macron) in brief (until August 11, 2026):

Massive forest fires in Gironde (southwest France) at the end of July: Macron described them as the worst since World War II, visited the area, and oversaw the firefighting operations.

Social media ban for those under 15: approved in July and scheduled to take effect in September.

Recent diplomatic contacts: with Mohammed bin Salman (regional security), the Iraqi Prime Minister, and Sisi.

Condemnation of the Russian attacks against Kyiv (August 5) and calls for additional sanctions.

Historic visit to Syria in July to meet with Ahmed al-Sharia despite the nearby bombings.

2027 elections: April 18 and May 2; Marine Le Pen announces her candidacy despite the condemnations.

Latest news from the US presidency

In brief (until August 11, 2026):

The current president is Donald Trump (second term, since January 20, 2025), and the vice president is J.D. Vance.

Recent highlights:

August 10: An executive order is signed reducing the number of recommended childhood vaccinations (from approximately 17-18 to 11) and calling for the MMR vaccine to be administered in separate visits (with the participation of Robert Kennedy Jr.).

Todd Blanch (Trump's former lawyer) is confirmed as Attorney General by a 50-49 Senate vote.

Continued tensions/conflict with Iran (strikes, the Strait of Hormuz, oil).

Preparations are underway for the November 2026 midterm elections, with the National Guard continuing its deployment in Washington, D.C.

These are the most important current developments.

KUMA Fɔɔɔ

Latest news from the US presidency

In brief (until August 11, 2026):

The current president is Donald Trump (second term, since January 20, 2025), and the vice president is J.D. Vance.

Recent highlights:

August 10: An executive order is signed reducing the number of recommended childhood vaccinations (from approximately 17-18 to 11) and calling for the MMR vaccine to be administered in separate visits (with the participation of Robert Kennedy Jr.).

Todd Blanch (Trump's former lawyer) is confirmed as Attorney General by a 50-49 Senate vote.

Continued tensions/conflict with Iran (strikes, the Strait of Hormuz, oil).

Preparations are underway for the November 2026 midterm elections, with the National Guard continuing its deployment in Washington, D.C.

These are the most important current developments.

KUMA Fɔɔɔ

Chinese Agriculture

Brief Summary (Late March 2026): Nationwide, approximately 65% of early rice seedlings have been raised, and about 10% have been transplanted.

In Guangdong, over 13 million mu (approximately 867,000 hectares) have entered peak transplanting season, with the promotion of high-quality varieties and reasonable planting density (the yield per mu in the Qingyuan demonstration field is expected to increase by about 10%).

In Yunxiao, Zhangzhou, Fujian, factory-style seedling raising is operating efficiently (approximately 500 trays per hour, supplying 30 mu (approximately 2 hectares)). With over 400 demonstration sites across the province, approximately 66,000 mu (approximately 4,400 hectares) have been transplanted at that time. Spring plowing is progressing in an orderly manner overall, and centralized seedling

raising is a key measure for stabilizing the acreage.

In Guangdong, over 13 million mu (approximately 867,000 hectares) have entered peak transplanting season, with the promotion of high-quality varieties and reasonable planting density (the yield per mu in the Qingyuan demonstration field is expected to increase by about 10%).

In Yunxiao, Zhangzhou, Fujian, factory-style seedling raising is operating efficiently (approximately 500 trays per hour, supplying 30 mu (approximately 2 hectares)). With over 400 demonstration sites across the province, approximately 66,000 mu (approximately 4,400 hectares) have been transplanted at that time. Spring plowing is progressing in an orderly manner overall, and centralized seedling raising is a key measure for stabilizing the acreage.

KUMA Fɔɔɔ

France : Les vendanges en Champagne ont débuté le 10 août, un record de précocité par rapport aux années précédentes (où elles commençaient généralement en septembre).

La raison : Les fortes chaleurs et les canicules fréquentes ont accéléré la maturation des raisins, faisant craindre des dégâts sur la récolte ou des brûlures dues au soleil en cas de retard des vendanges.

Défis et solutions d'adaptation :

Météo : Les travaux ont commencé tôt, à 6 h, afin d'éviter les températures diurnes dépassant 38 °C.

Main-d'œuvre : La difficulté à trouver des vendangeurs en pleine période estivale a contraint certains travailleurs du secteur à revenir immédiatement et à faire appel à des renforts.

Contexte : Ce défi climatique survient alors que les producteurs champenois subissent déjà une baisse de leurs ventes depuis plusieurs années.

BAMANANKAN NA

KUMA FɔLɔ

France : Les vendanges en Champagne ont débuté le 10 août, un record de précocité par rapport aux années précédentes (où elles commençaient généralement en septembre).

La raison : Les fortes chaleurs et les canicules fréquentes ont accéléré la maturation des raisins, faisant craindre des dégâts sur la récolte ou des brûlures dues au soleil en cas de retard des vendanges.

Défis et solutions d'adaptation :

Météo : Les travaux ont commencé tôt, à 6 h, afin d'éviter les températures diurnes dépassant 38 °C.

Main-d'œuvre : La difficulté à trouver des vendangeurs en pleine période estivale a contraint certains travailleurs du secteur à revenir immédiatement et à faire appel à des renforts.

Contexte : Ce défi climatique survient alors que les producteurs champenois subissent déjà une baisse de leurs ventes depuis plusieurs années.

BAMANANKAN NA

Faransi: Champagne, suman tige daminɛna Awirilikalo tile 10, o ye waati ye min ma deli ka ke fɔɔ ni i y'a suma ni san tɛmɛnnɛnw ye (u tun be daminɛ yɔɔɔ min na caman na setanburukalo la).

O kun : Funteni jugumanba ni funteni min tun be ke tuma caman na, o ye rezen mɔli teliya, o ye siran bila suman tigecogo tiɲɛni na walima jeninida la tile fe ni suman tige waati tɛmɛna.

Geɓɓaw ni ladamuni fɛɛɓɓaw:

Waati: Baara daminɛna joona, sɔɔɔma 6 waati, walasa tile funteni kana tɛmɛ 38°C kan.

Baara : Geɓɓa min be pickers sɔɔɔli la samiye cɛmance la, o ye baarakɛla dɔw wajibiya o seko ni dɔnko la, u ka segin joona, ka wele bila ka fanga di u ma.

Kunnaɲɔni : Nin waati geleya in be na waati min na, Champagne dilannikɛlaw be ka tɔɔɔɔɔ u ka feereli dɔɔɔyali la kaban kabini san damadɔ.

KUMA FOLLO

Dans ces vignes millénaires de Champagne, les vendanges n'avaient commencé aussi tôt dans l'été.

On remplit bien les caisses, beaucoup de raisins là.

Le 10 août, pour cette parcelle près de 3, un mois d'avance, un record historique et une surprise pour les vendangeurs d'être mobilisés au cœur de l'été.

La première fois que je l'ai fait, c'était en septembre. Mais au fur et à mesure, les dates redescendent. Ça cause du canicule.

Le fruit est déjà mûr et sucré.

On vient l'arracher. Il a la maturité parfaite, le raisin. On voit les grains, couleur un petit peu dorée. C'est parfait à être pressé, vous voyez, ça va tout seul.

Impossible d'attendre plus pour Stéphanie Doué. Voilà, parfait. Un jour de chaleur supplémentaire pourrait griller ces raisins déjà fragiles.

C'est à cause de l'exposition au soleil parce qu'on a des longues journées de canicule. Toutes les canicules accumulées ont vraiment fait du mal à la vigne.

Le rythme ne doit pas faiblir. C'est bon là-dessus, vous avez tout rempli les caisses? Plus de 38 degrés annoncés dans la semaine et ce matin, le soleil commence déjà à taper. Ça passe bien?

Ça va. Pas trop chaud? Pas trop chaud.

Alors exceptionnellement cette année, rendez-vous à 6h du matin dans les vignes.

On va rechercher la fraîcheur au plus tôt, donc on est obligé de s'adapter aux nouvelles conditions climatiques.

Mais difficile de trouver de la main d'oeuvre dans l'été, quand la plupart des vendangeurs sont encore en vacances. Eva Magloire, salariée dans une association de producteurs de champagne, est revenue de congé en urgence pour donner un coup de main à l'exploitation.

J'ai un truc mis en renfort parce que les maturités étaient vachement avancées. Donc étant du coin, j'arrive à la rescousse.

Cette récolte précoce est un nouveau défi pour les producteurs de champagne qui font déjà face depuis plusieurs années à une baisse de leur vente.

BAMANANKAN NA

O Champagne rezensun minnu si be san ba kelen ɓɓ, suman tige tun ma damine ten samiye damine na ten.

An be kesu fa ka ɲe, rezen caman be yen.

KUMA FOLLO

U.S. Agriculture Secretary Brooke Rollins discusses her efforts since taking office:

She began by conducting direct meetings with farmers and ranchers to understand their needs and translate them into action.

She inherited a difficult situation: a shift from an agricultural trade surplus to a projected deficit of approximately \$50 billion, coupled with rising production costs and excessive bureaucracy.

What she did: She negotiated 20 trade deals, opened new markets, provided over \$40 billion in assistance to farmers, strengthened the agricultural safety net, expanded crop insurance, streamlined procedures, reduced costs, and protected agriculture from threats like the New World Screwworm.

The result: More business opportunities, lower costs, a stronger safety net, and a Department of Agriculture that listens to farmers.

The next step:

Farmer participation rates in Department of Agriculture surveys have dropped from 85-90% to around 40%. Therefore, it is working to update data collection methods to reduce the burden on farmers and improve accuracy and transparency, through hearings at agricultural fairs and events.

BAMANANKAN NA

KUMA FOLD

U.S. Agriculture Secretary Brooke Rollins discusses her efforts since taking office:

She began by conducting direct meetings with farmers and ranchers to understand their needs and translate them into action.

She inherited a difficult situation: a shift from an agricultural trade surplus to a projected deficit of approximately \$50 billion, coupled with rising production costs and excessive bureaucracy.

What she did: She negotiated 20 trade deals, opened new markets, provided over \$40 billion in assistance to farmers, strengthened the agricultural safety net, expanded crop insurance, streamlined procedures, reduced costs, and protected agriculture from threats like the New World Screwworm.

The result: More business opportunities, lower costs, a stronger safety net, and a Department of Agriculture that listens to farmers.

The next step:

Farmer participation rates in Department of Agriculture surveys have dropped from 85-90% to around 40%. Therefore, it is working to update data collection methods to reduce the burden on farmers and improve accuracy and transparency, through hearings at agricultural fairs and events.

China's Diplomatic Update (July 2026):

With the United States: Wang Yi met with Rubio in Manila on July 22. They discussed President Xi Jinping's possible visit to the US in September, reaffirmed their "stable and constructive strategic relationship," and prepared for a high-level meeting.

Wang Yi's Recent Activities:

Met with the foreign ministers of India, Brazil, Iran, Russia, and Pakistan.

At the Shanghai Cooperation Organisation (SCO) Meeting (July 24):

Called for a dialogue to resolve the Middle East conflict and strengthened cooperation within the SCO.

Upcoming Visits: Wang Yi will visit the Nordic countries (Denmark, Sweden, Finland, and Norway) in July. The President of Slovakia will also visit China soon.

Other Positions: Opposes US tariffs, supports stability in the South China Sea, and promotes cooperation with ASEAN and other developing countries.

KUMA FOLLO

Новые больницы, поликлиники и другие объекты здравоохранения будут построены в российских регионах. В ближайшие три года правительство направит на эти цели более 6 миллиардов рублей Мордовии, Кабардино-Балкарии, Магаданской, Псковской, Ростовской и Челябинской областям, а также Камчатскому и Красноярскому краям.

Важно, чтобы наши граждане своевременно получали квалифицированное лечение, независимо от местонахождения, от места их проживания.

Парк отечественных авиакомпаний продолжит обновляться, а полеты станут доступнее.

В текущем году на реализацию комплексной программы развития авиационной отрасли правительство направит свыше 250 миллиардов рублей.

Средства пойдут на поставки новых самолетов и вертолетов, расширение производственных мощностей авиационных предприятий. Дополнительно в этом году правительство выделит 2,6 миллиарда рублей на достройку первых трех серийных самолетов Ил-114-300. Будет запущена программа льготного кредитования для авиакомпаний, которые берут в лизинг самолеты MC-21. Кроме того, будет дополнительно профинансировано производство 72 вертолетов Ми-8, которые используются для пассажирских перевозок, санитарной авиации и спасательных операций в удаленных и труднодоступных районах.

Продолжим и далее делать все необходимое для того, чтобы полеты во всех уголках страны становились доступнее для наших граждан.

Правительство усилило меры по обеспечению топливом внутреннего рынка. Запрет на экспорт отдельных видов топлива продлен до конца января следующего года. Также принято решение, которое позволит обеспечить аграриев топливом в период полевых работ и не допустить перебоев с поставками для государственных и муниципальных учреждений. Михаил Мишустин посетил регионы Дальнего Востока и Сибири. В Якутске глава правительства осмотрел республиканский онкологический

диспансер, где ознакомился с работой отделений и лабораторий, а также побеседовал с представителями волонтерского движения «Антирак».

Поддержка выживших».

«Здесь только люди, которые искренне живут тем, чтобы создать все условия для получения самых высоких стандартов обслуживания».

Михаил Мишустин также посетил креативный кластер «Квартал труда». Здесь расположены компании, работающие в кинопроизводстве, анимации, разработке видеоигр, медиа и других творческих отраслях. Глава правительства пообщался с резидентами кластера и поддержал инициативу о создании в Якутии центра обработки данных для Дальнего Востока.

Не секрет сегодня, что данные, особенно данные, которые можно обработать, кластеризовать, — это новая нефть, платина, новые полезные ископаемые XXI века. Конечно, нужно этим заниматься. Высокопроизводительная инфраструктура для сервисов искусственного интеллекта, конечно, нужна в Восточном кластере. Мы это полностью поддерживаем.

В завершение поездки Михаил Мишустин обсудил социально-экономическое развитие Якутии с главой региона Айсеном Николаевым. Следующим пунктом рабочей поездки Михаила Мишустина стала Республика Тыва. В Кызыле председатель правительства посетил завод по производству железобетонных изделий. В Республиканском консультативно-диагностическом центре председатель правительства осмотрел отделения, где проводят разные виды исследований и диагностики, а также центр медицинской реабилитации, где оказывают помощь участникам СВО.

Президентская программа модернизации первичного звена позволила за эти несколько лет на сегодня построить 6,5 тысячи новых объектов здравоохранения в первичном звене. Также около 8 с лишним тысяч объектов было полностью реконструировано, модернизировано.

Также Михаил Мишустин посетил среднюю школу, построенную в рамках нацпроекта «Образование». Он осмотрел кабинеты, библиотеку, а также столовую, где обедали ребята из пришкольного лагеря дневного пребывания.

Было полностью построено 1700 новых школ, около 6500 школ было отремонтировано, приведено в порядок.

С главой Республики Тыва Владиславом Ховалыгом Михаил Мишустин обсудил социально-экономическое развитие региона.

Правительство России

Le 2 août à 18:00

Работа Правительства. Главные события и решения недели – в дайджесте:

Правительство направит более 6 млрд рублей на строительство поликлиник и больниц 8 регионам: Мордовии, Кабардино-Балкарии, Магаданской, Псковской, Ростовской и Челябинской областям, Камчатскому и Красноярскому краям.

Более 250 млрд рублей направят на реализацию комплексной программы развития авиации в 2026 году. Средства пойдут на поставки новых самолетов и вертолетов, расширение производств авиационных предприятий. Еще 2,6 млрд рублей Правительство выделит на достройку первых трех самолетов Ил-114-300. Для авиакомпаний, которые берут в лизинг MC-21, запустят программу льготного кредитования. Дополнительное финансирование получит производство 72 вертолетов Ми-8. В результате авиапарк продолжит обновляться, а перелеты станут доступнее.

Запрет на экспорт отдельных видов топлива продлен до конца января 2027 года – это важно для внутреннего рынка. Также приняты решения для бесперебойного обеспечения топливом аграриев в период полевых работ.

Михаил Мишустин посетил регионы Дальнего Востока и Сибири.

• В Якутске глава Правительства осмотрел республиканский онкологический диспансер, а также побеседовал с представителями волонтерского движения «Антирак: поддержка выживших». Глава Правительства также посетил креативный

кластер «Квартал труда». Он пообщался с резидентами кластера и поддержал инициативу о создании в Якутии центра обработки данных для Дальнего Востока. В завершение поездки Михаил Мишустин обсудил социально-экономическое развитие Якутии с главой региона Айсеном Николаевым.

• Следующим пунктом рабочей поездки Михаила Мишустина стала Республика Тыва. В Кызыле Председатель Правительства посетил завод по производству железобетонных изделий, Республиканский консультативно-диагностический центр и среднюю школу, построенную по нацпроекту «Образование». В завершение поездки Михаил Мишустин обсудил социально-экономическое развитие Республики Тыва с главой региона Владиславом Ховалыгом.

Taamasiyen: 318 • Waati: 2026-08-06 17:53:22 CEST • Kan min y'a fɔ: en

KUMA Fɔɔɔ

This is the Bambara ASR Benchmark from MALIBA-AI — a high-quality evaluation dataset for Bambara speech recognition. It contains 500 studio-recorded segments (~1 hour) of constitutional text spoken by one male speaker.

What would you like me to do with this? I can:

- Analyze the dataset — load it and show duration distribution, vocabulary stats, sample audio/text pairs
- Visualize it — charts of segment lengths, word frequency, audio waveforms
- Explain how to use it — for ASR model evaluation or fine-tuning
- Compare it — with your TTS needs (note: this is ASR data, not TTS voices)
- Or if you have a specific task in mind, tell me

BAMANANKAN NA

Nin ye Bamanankan ASR Benchmark ye ka ɓɔ MALIBA-AI — jatemine kunnafonidilan min ka ɲi koseɓe bamanankan kuma donni kama. A ƙɔɲɔ, sariyasunba seɓenni ɲɔɲɔ 500 be ɲɔɲɔ a ƙɔɲɔ minnu seɓenna studio la (~lere 1) minnu fɔra ce kumalasela kelen fe.

I b'a fe ne ka mun ke ni nin ye? Ne be se ka:

KUMA Fɔɓɓɔ

This is the Bambara ASR Benchmark from MALIBA-AI — a high-quality evaluation dataset for Bambara speech recognition. It contains 500 studio-recorded segments (~1 hour) of constitutional text spoken by one male speaker.

What would you like me to do with this? I can:

- Analyze the dataset — load it and show duration distribution, vocabulary stats, sample audio/text pairs
- Visualize it — charts of segment lengths, word frequency, audio waveforms
- Explain how to use it — for ASR model evaluation or fine-tuning
- Compare it — with your TTS needs (note: this is ASR data, not TTS voices)
- Or if you have a specific task in mind, tell me

BAMANANKAN NA

Nin ye Bamanankan ASR Benchmark ye ka ɓɔ MALIBA-AI — jatemine kunnafonidilan min ka ɲi koseɓe bamanankan kuma donni kama. A ƙɔɲɔ, sariyasunba seɓenni ɲɔɲɔ 500 be ɲɔɲɔ a ƙɔɲɔ minnu seɓenna studio la (~lere 1) minnu fɔra ce kumalasela kelen fe.

I b'a fe ne ka mun ke ni nin ye? Ne be se ka:

Donanw segesegeli — k'a doni ani ka waati janya jira, daɲɛw jateɓɔ, misali lamentaw/seɓenni fila-fila

Aw k'a laje i ɲɛ na — segin janya jatɛw, daɲɛw fɔcogo, fɔlikan fɔcogo

A baaracogo ɲɛfɔ — ASR modeli jatemineɲi walima a labenni numan kama

Aw k'a suma — n'aw ka TTS magow ye (kɔɓɔsili: nin ye ASR data ye, TTS kanw te)

Please explain this error:

```

```

[OBJ]
error

```

```

[OBJ]
SyntaxError: invalid syntax

```

```

[OBJ]
spark

```

The `SyntaxError: invalid syntax` on line 9 is caused by un-commented Arabic text in the code. I've fixed this by converting the Arabic text to proper Python comments, defining the `Speakers` class, renaming Arabic variables to English, standardizing control flow, and defining the global `sr` variable. I've also integrated the `convert_numbers_to_bambara_words` function and its `re` import to ensure the code is complete and functional.

The code executed successfully! You'll see messages indicating speech generation for your Bambara text, with numbers correctly converted to words. The `standard_error` messages about 'missing `ScriptRunContext`' are expected warnings because Streamlit functions are being run in a Colab notebook rather than a deployed Streamlit application. You can safely ignore them as they do not affect the functionality of your code in this environment.

How can I use MoviePy to merge the generated audio with a video file?

```

```

[OBJ]
spark

```

Sure, here's how you can use MoviePy to merge the generated audio with a video file. I'll provide a placeholder video path; you'll need to replace it with your actual video file.

The code couldn't find the input video file at `/tmp/your_input_video.mp4`. As a result, a dummy black video was created and used for the merge operation instead. To proceed with your actual video, please replace the placeholder value of `input_video_path` with the correct path to your video file. If you haven't uploaded a video to your Colab environment yet, you'll need to do that first. Once you've updated the path, re-run the cell.

KUMA FOLD

Red meat prices in America have reached record highs. President Trump announced his intention to significantly increase beef imports from Argentina (almost quadruple them) to lower prices for consumers, considering Argentina a good ally.

This announcement led to a sharp drop in wholesale cattle prices within America.

CBS correspondent Lana Zak reported on the reaction of farmers in Iowa (the heart of American agriculture): Caterpillars like Perlin and Pete Wopter were finally looking forward to turning a profit after years of losses, especially since soybean and corn prices were severely impacted by the trade war with China.

They considered Trump's decision a blow to them, saying that his "America First" policy and tariffs were intended to support domestic production, but that increased imports were harming them.

Brian Wiley, president of the Iowa Cattlemen's Association, confirmed that the additional quantity would represent only a very small percentage of the total American supply (about 2.5%) and would not significantly reduce supermarket prices.

The White House responded that Trump "loves cattle ranchers," but that increasing supply is the best way to lower prices. Farmers are still waiting for details of the promised aid package, which has been delayed due to the government shutdown.

BAMANANKAN NA

Sogo bilenman songo sera Ameriki jamana na, a hake min ma deli ka 𐌆𐌗𐌊 𐌆𐌗𐌊. Jamanakuntigi Trump y'a jira k'a b'a fe ka dɔ fara kosebe misisogo dontaw kan ka bɔ Arzantine (a be se ka ke u siɲe naani ye) walasa ka songo dɔɔɔya feerekɛlaw bolo, k'a jate ko Arzantine ye 𐌆𐌗𐌊𐌆𐌗𐌊 ɲuman ye.

KUMA FɔLD

China launched an investigation in August 2024 into subsidies for European dairy products (high-fat cheese and cream) in retaliation for EU tariffs on Chinese electric vehicles.

December 2025: Provisional tariffs of 21.9%–42.7%.

February 2026: Final tariffs reduced to 7.4%–11.7% for five years.

For electric vehicles: Final EU tariffs in October 2024 (up to ~35%), followed by a framework agreement in January 2026 allowing for “minimum price commitments” as an alternative.

Grégoire Cardon is a fish farmer in Sarthe, France, who has specialized in raising Asian ornamental koi fish for about 20 years.

He feeds them every morning.

The young fish (around 10 months old)

They are later sorted: the prettiest ones are raised, and some are sold.

The market is limited (only about 10 farms in France), and prices range from a few euros to 5,000 euros per fish.

Ornamental fish represent 40% of his income, and he also sells online.

KUMA FOLLO

Chaque matin, pour Grégoire Cardon, c'est le même rituel. Un seau de granulés pour nourrir ses protégés, des carpes koi, un poisson ornemental asiatique. L'élevage commence dans ce bassin équipé de fils anti-cormorans, car à cette étape, la koi est encore vulnérable.

Ces poissons-là ont 10 mois à peu près. Ils sont nés en mai-juin 2013. Ce sont des poissons qui vont bientôt être pêchés, collectés pour pouvoir les trier, remettre une partie en grossissement, les plus jolies, et puis une partie va être vendue aussi. Ce sont des poissons qui n'ont pas encore un an.

Vingt ans que ce fils de pisciculteur s'est spécialisé dans ce marché de niche. Ils sont à peine une dizaine en France. Le coup de foudre pour ces carpes multicolores est un retour sur investissement. Des spécimens à quelques euros et d'autres un peu plus chers, une trentaine sur 5 000 poissons.

Ça, c'est un Hi Utsuri ; ça veut dire rouge et noir en japonais. Elle est de belle qualité, c'est-à-dire que les taches noires sont très bien marquées, comme si elles avaient été faites avec un pochoir, presque. Les couleurs ne bavent pas. C'est vraiment un poisson de belle qualité qui va se vendre à peu près 150 euros.

Les acquéreurs : des collectionneurs, de fins connaisseurs belges ou français. Le marché est en expansion. Le pisciculteur en propose même à la vente sur Internet.

Le client a commandé un lot de 10 carpes koi de 7 à 10 cm. Donc, on va aller le préparer, le mettre en colis, prêt à partir par transport

express.

Aujourd'hui, les carpes koi et autres poissons d'ornement représentent 40 % du chiffre d'affaires de Grégoire Cardon. Les plus chers pouvant atteindre les 5 000 euros.

BAMANANKAN NA

KUMA Fɔɔɔ

Red meat prices in America have reached record highs. President Trump announced his intention to significantly increase beef imports from Argentina (almost quadruple them) to lower prices for consumers, considering Argentina a good ally.

This announcement led to a sharp drop in wholesale cattle prices within America.

CBS correspondent Lana Zak reported on the reaction of farmers in Iowa (the heart of American agriculture): Caterpillars like Perlin and Pete Wopter were finally looking forward to turning a profit after years of losses, especially since soybean and corn prices were severely impacted by the trade war with China.

They considered Trump's decision a blow to them, saying that his "America First" policy and tariffs were intended to support domestic production, but that increased imports were harming them.

Brian Wiley, president of the Iowa Cattlemen's Association, confirmed that the additional quantity would represent only a very small percentage of the total American supply (about 2.5%) and would not significantly reduce supermarket prices.

The White House responded that Trump "loves cattle ranchers," but that increasing supply is the best way to lower prices. Farmers are still waiting for details of the promised aid package, which has been delayed due to the government shutdown.

BAMANANKAN NA

Sogo bilɛnman sɔngɔ sera Ameriki jamana na, a hake min ma deli ka sɔɔɔ fɔɔ. Jamanakuntigi Trump y'a jira k'a b'a fɛ ka dɔ fara kɔsɛbɛ misisogo dontaw kan ka bɔ Arzantine (a bɛ se ka kɛ u sijɛ naani ye) walasa ka sɔngɔ dɔgɔya feerekɛlaw bolo, k'a jate ko Arzantine ye jɛɔɔɔɔ juman ye.

KUMA FOLD

.

Caterpillars like Perlin and Pete Wopler were finally looking forward to turning a profit after years of losses, especially since soybean and corn prices were severely impacted by the trade war with China.

They considered Trump's decision a blow to them, saying that his "America First" policy and tariffs were intended to support domestic production, but that increased imports were harming them.

Brian Wiley, president of the Iowa Cattlemen's Association, confirmed that the additional quantity would represent only a very small percentage of the total American supply (about 2.5%) and would not significantly reduce supermarket prices.

The White House responded that Trump "loves cattle ranchers," but that increasing supply is the best way to lower prices. Farmers are still waiting for details of the promised aid package, which has been delayed due to the government shutdown.

KUMA FOLD

Red meat prices in America have reached record highs. President Trump announced his intention to significantly increase beef imports from Argentina (almost quadruple them) to lower prices for consumers, considering Argentina a good ally.

This announcement led to a sharp drop in wholesale cattle prices within America.

CBS correspondent Lana Zak reported on the reaction of farmers in Iowa (the heart of American agriculture): Caterpillars like Perlin and Pete Wopler were finally looking forward to turning a profit after years of losses, especially since soybean and corn prices were severely impacted by the trade war with China.

They considered Trump's decision a blow to them, saying that his "America First" policy and tariffs were intended to support domestic production, but that increased imports were harming them.

Brian Wiley, president of the Iowa Cattlemen's Association, confirmed that the additional quantity would represent only a very small percentage of the total American supply (about 2.5%) and would not significantly reduce supermarket prices.

The White House responded that Trump "loves cattle ranchers," but that increasing supply is the best way to lower prices. Farmers are still waiting for details of the promised aid package, which has been delayed due to the government shutdown.

KUMA Fɔɔ

On the CBS MoneyWatch, red meat prices are at record highs. But President Trump's push to import beef from Argentina to lower costs is a growing beef in the Heartland. CBS' Lana Zak is the only network correspondent based in Iowa and has been following the story and reporting on the issue for us tonight.

Hey there, Jericka. As you know, the tariffs and the trade wars have completely crushed soybean prices, but cattle had been on the rebound. That is, until now. Come on. Come on. After several years of losing money on cattle, Berlin and Pete Wobetter were looking forward to turning a profit. They also grow corn and soy, those sales devastated by the ongoing trade war with China. How important is it to you that you have cattle when soy and corn are going so poorly?

Well, it's going to depend on the year, but this year, it is the one thing that is going to make any money for us.

So the Wobettters were astounded when President Trump announced he wanted to quadruple beef imports from Argentina.

If we do that, that will bring our beef prices down. It would help Argentina, which we consider a very good country, a very good ally.

His words sent wholesale cattle prices plummeting. In the supermarket, the price of meat has skyrocketed over the past year. Ground

beef up nearly 13%, steak up 16%.

You have to look at the total supply chain.

Bryan Whaley is CEO of the Iowa Cattlemen's Association. He says Americans won't really see grocery savings from increasing beef imports.

It really only is going to be about 2.5% of our total beef supply. It's really not going to make a substantial difference.

The Wobettters and their neighbors say they're disappointed that the president's America First trade agenda doesn't include them.

The whole point of tariffs was to bring production back home. So we are producing beef here, and now he is trying to do something to destroy that production.

We're being used and abused as producers.

It feels like being a pawn in a game we're not going to win.

Now, the White House press secretary says President Trump "loves ranchers," but that increasing the beef supply is the best way to bring down prices. Meanwhile, all farmers are still waiting on the details of that promised aid package that has been put on hold because of the government shutdown. Jericka?

All right, Lana Zak for us tonight. Thank you.

BAMANANKAN NA

CBS MoneyWatch kan, sogo bilenman songo be ka caya kosebe. Nka jamanakuntigi Trump ka cesiri ka misisogo ladon ka bo Arzantine walasa ka musaka dogya, o ye misisogo ye min be ka bonya Heartland kono. KUMA FɔLD

The U.S. Department of Agriculture announced the discovery of the New World screwworm in a newborn calf in Texas, nearly 60 years after its eradication in the United States (1966).

The farmer, Robbie Graff, reported the infestation immediately, allowing for the release of sterile flies within two days and halting the spread.

This is part of a larger outbreak in Texas in June 2026, which is being addressed through quarantine and the release of sterile flies to protect livestock.

KUMA FɔLD

00:29 --> 00:56

Monsieur le Président de la Transition, chef de l'État, le personnel de la présidence est en place pour la grande cérémonie des couleurs, au moment de l'exécution de l'hymne national par la musique de la sécurité présidentielle.

00:57 --> 00:58

Aidez-moi !À ton appel, Mali !

00:58 --> 01:11

Pour ta prospérité, fidèle à ton destin, nous serons tous unis.

01:11 --> 01:19

Un peuple, un but, une foi, pour une Afrique unie.

01:20 --> 01:45

Si l'ennemi découvre son front au-dedans ou au-dehors, debout sur les remparts, nous sommes résolus de mourir pour l'Afrique et pour toi, Mali. Notre drapeau sera liberté.

01:47 --> 01:53

Sous-titrage : Société Radio-Canada

02:13 --> 02:32

Monsieur le Président de la Transition, chef de l'État, fin de la grande cérémonie des couleurs, venez voir.

02:32 --> 02:32

Merci.

BAMANANKAN NA

00:29 --> 00:56 ye

Tɛmɛsira ɲemɔgɔba, jamanakuntigi, jamanakuntigi ka baarakɛlaw bɛ u nɔ na kulɛriw seliba in kama, jamana dɔnkili da waati

la jamanakuntigi lakanani fɔlikan fɛ.

00:57 --> 00:58 ye

Aw ka n dɛmɛ! I ka weleli la, Mali!

00:58 --> 01:11 ye

I ka ɲɛtaa kama, kantigiya i ka sinɲɛsigi la, an bɛɛ bɛna kɛ kelen ye.

01:11 --> 01:19 ye

Gouvernement de la République du Mali

#CIGMA #INFO | Campagne agricole 2026 : le Ministre Youba BA en visite à Kayes pour évaluer l'agriculture et l'élevage

Kayes, le 27 juillet 2026

Le Directeur de Cabinet du Gouverneur de la région de Kayes, Monsieur Amadou DICKO, a accueilli Monsieur Youba BA, Ministre de l'Élevage et de la Pêche, à l'aéroport Dag-Dag de Kayes, le mardi 28 juillet 2026.

Cette visite s'inscrit dans le cadre du suivi des recommandations issues de la 16ème session du Conseil Supérieur de l'Agriculture.

L'objectif selon le Ministre est de s'enquérir de l'évolution de la campagne agricole, notamment en ce qui concerne :

le niveau d'exécution des activités de la campagne agricole par les structures techniques ;

f. le processus de mise à disposition de l'aliment bétail, issu des 10 % de la production totale de graines de coton de la campagne 2025, accordé par Son Excellence le Général d'Armée Assimi GOÏTA, Président de la Transition, Chef de l'État, aux éleveurs et cotonculteurs ;

‡ la vaccination du cheptel ;

‡ l'évolution des activités de pêche, de pisciculture et d'aquaculture.

France Élevage de poules et d'escargots à la ferme Gaensmatt

Comment assurer la pérennité d'une exploitation agricole? Certains choisissent de diversifier leurs productions et de privilégier la vente directe. C'est le cas de Carole et Nicolas Konradt. Céréaliers et viticulteurs, ils ont choisi il y a un an de se lancer dans l'élevage d'escargots. Et ce mois-ci, ils démarrent un élevage de poules pondeuses.

KUMA Fɔɓɔ

In July 2026, Agriculture Secretary Brooke Rollins announced that the New World screwworm fly (which had been eradicated in the United States in 1966) was attempting a comeback. The Department of Agriculture responded quickly, investing over \$1 billion in sterile fly production.

Sixty days after the first cases appeared, there were only 42 confirmed cases, 9 active, and all infected animals had recovered.

As a result, Port Douglas in Arizona reopened for livestock imports (away from the outbreak site) with continued close monitoring, but

without declaring a final victory.

BAMANANKAN NA

Zuluyekalo san 2026, seneko minisiri Brooke Rollins y'a jira ko Dijne kura sagdsagdninje wulu (min tun tijnena Ameriki san 1966) be ka segin ka segin. Seneko minisiriso ye jaabi teliya la, a ye dɔrɔmɛ miliyari kelen ni ko bila wuluw dilanni na minnu te sterili ye.

The White House now wants to put more military veterans behind the wheel of a big rig. The president today, along with Transportation Secretary Sean Duffy, announcing the Freedom Haulers Initiative. It's a way, they say, to fast-track veterans into trucking jobs. And at the event at the White House today, Trump saying America's roads have been, quote, terrorized by unqualified illegal aliens dangerously driving big rigs. Initiative, any American who has driven a heavy truck for our military will automatically be eligible for a commercial driver's license. And it's good-paying jobs, too. Any veteran with a heavy vehicle experience from the military will now be eligible to skip redundant road tests to obtain a commercial driver's license. We're going to make it as easy as possible for the veterans. The White House has indeed been cracking down on commercial truck drivers who obtained a CDL while in the country illegally. It all follows a series of high-profile and deadly crashes over the past year and a half. In fact, the administration has now pulled about 26,000 of those drivers off of American roadways, all, they say, for failing to demonstrate English proficiency.

KUMA FOLLO

Emmanuel Macron thanked Ukraine for sending 70 rescue workers and 15 specialized vehicles to fight the devastating wildfires ravaging southwestern France, particularly the Gironde region. This marks the first time Ukraine has intervened as an aid provider to an EU member state through the European Civil Protection Mechanism, following a meeting between Mr. Macron and Mr. Zelensky. Beginning in July 2016, these fires have ravaged over 110,000 hectares, triggered mass evacuations, and required the intervention of several European countries.

KUMA FOLD

The White House now wants to put more military veterans behind the wheel of a big rig. The president today, along with Transportation Secretary Sean Duffy, announcing the Freedom Haulers Initiative. It's a way, they say, to fast-track veterans into trucking jobs. And at the event at the White House today, Trump saying America's roads have been, quote, terrorized by unqualified illegal aliens dangerously driving big rigs. Initiative, any American who has driven a heavy truck for our military will automatically be eligible for a commercial driver's license. And it's good-paying jobs, too. Any veteran with a heavy vehicle experience from the military will now be eligible to skip redundant road tests to obtain a commercial driver's license. We're going to make it as easy as possible for the veterans. The White House has indeed been cracking down on commercial truck drivers who obtained a CDL while in the country illegally. It all follows a series of high-profile and deadly crashes over the past year and a half. In fact, the administration has now pulled about 26,000 of those drivers off of American roadways, all, they say, for failing to demonstrate English proficiency.

KUMA FOLɔ

Campagne agricole 2026-2027, une mission de supervision régionale de Kita a sillonné certains champs de maïs, d'arachide et de coton afin de suivre et d'évaluer le démarrage effectif de la campagne dans la région et aussi analyser la situation. Mahamadi Aliou Barry, correspondance.

Cette visite du chef de l'exécutif régional Daouda Maïga était venue s'enquérir de l'état d'évolution de la campagne agricole 2026-2027 dans la région de Kita. Elle a ainsi échangé avec les acteurs et producteurs sur la gestion des intrants agricoles subventionnés. Le premier constat est que l'état des cultures est rassurant malgré la mauvaise répartition des pluies.

Nous sommes très ravis de cette visite du gouverneur. Alors, nous demandons l'accompagnement des autorités pour l'acheminement rapide des intrants.

Je suis convaincu qu'à travers cette visite du gouverneur, nous, paysans, nous aurons une réponse favorable, car les cultures du coton sont à l'étape de semi-lévée.

La délégation a pu constater cela de visu en visitant les champs de maïs, de l'arachide et de coton d'Amarou Diara et Mamby Kamisoko. Les visiteurs se disent impressionnés par ce qu'ils ont vu.

La campagne a connu un léger retard par rapport à la campagne 2025. Ça, c'est dû à la situation pluviométrique actuelle, parce que les producteurs sont en train de semer au rythme de la situation pluviométrique.

Nous avons enregistré précocement des pluies en mai, mais nous avons quand même connu quelques postes de sécheresse au mois de juin. Mais qu'à cela ne tienne, avec l'enregistrement des différentes hauteurs, euh, pluviométriques, les producteurs se sont engagés à faire des emblavures.

Nous nous sommes déplacés pour cette raison, pour dire aux paysans que tout ce que nous faisons, tout ce que notre économie engrange vient essentiellement de leur travail. Donc, pour les encourager, leur dire ce que nous faisons à la hiérarchie et leur demander également beaucoup de courage et d'abnégation afin que la campagne de cette année rayonne.

Pour cette campagne 2026, dans la région de Kita, plus de cinq cent quarante-et-un mille hectares de terres seront emblavées pour une production prévisionnelle de plus de quatre cent soixante-trois mille sept cent soixante-quatorze tonnes, toutes spéculations confondues.

KUMA FOLD

Russian Government

July 26, 6:00 PM

Government Work. Key events and decisions of the week in the digest:

The government will help the Belgorod Region ensure the stable operation of its energy utility infrastructure. The region will receive over 8.6 billion rubles for the purchase of modular boiler houses, mobile modular substations, and power transformers.

New production facilities and jobs will emerge in Khakassia and Tatarstan. The government supported two initiatives for the development of special economic zones.

Russia will see an increase in the availability of high-quality domestic products. To this end, the government has adjusted the state program for agricultural development. Small farms planning to implement projects to accelerate dairy farming will receive grants of up to 265 million rubles. These funds can be used to increase herd size, purchase equipment, and address feed shortages. In addition, support is provided for farmers from border regions and agricultural producers participating in the SVO.

The government will help the Belgorod Region ensure the stable operation of its energy utility infrastructure. The region will receive over 8.6 billion rubles for the purchase of modular boiler houses, mobile modular substations, and power transformers.

New production facilities and jobs will emerge in Khakassia and Tatarstan. The government supported two initiatives for the development of special economic zones.

Russia will see an increase in the availability of high-quality domestic products. To this end, the government has adjusted the state program for agricultural development. Small farms planning to implement projects to accelerate dairy farming will receive grants of up to 265 million rubles. These funds can be used to increase herd size, purchase equipment, and address feed shortages. In addition, support is provided for farmers from border regions and agricultural producers participating in the SVO.

KUMA FOLƁ

Правительство поможет Белгородской области обеспечить стабильную работу энергетической и коммунальной инфраструктуры.Регион получит более 8,5 миллиарда рублей на закупку модульных котельных, мобильных модульных подстанций и силовых трансформаторов.

Правительство оказывает необходимую помощь для обеспечения деятельности топливно-энергетического и жилищно-коммунального комплексов, чтобы в домах, в садах, детских больницах,поликлиниках и других наиболее значимых для жителей учреждениях были электричество, вода и тепло.

В Хакасии и Татарстане появятся новые производства и рабочие места.Правительство поддержало две инициативы по развитию особых экономических зон.Новая особая экономическая зона «Хакасская технологическая долина» будет создана на территории Саяногорска и Бейского муниципального района.Ее резидентами станут пять компаний.Они займутся

переработкой алюминия, включая производство фольги и шариковых подшипников. К концу 2035 года объем инвестиций превысит 25 миллиардов рублей.

Будет создано около 900 рабочих мест. Также будет расширена особая экономическая зона «Зеленая долина» в Татарстане. На новом участке планируется реализовать 8 проектов, в том числе в сферах биотехнологий, нефтехимии и глубокой переработки сырья. Объем инвестиций новых резидентов составит почти 300 миллиардов рублей. На производствах будет создано более 1800 рабочих мест.

Проекты, которые реализуются благодаря этому инструменту, конечно, оказывают положительное воздействие на динамику экономики нашей страны на протяжении многих лет, помогают в том числе привлекать инвесторов в регионы, создавать там новые предприятия, увеличивать количество рабочих мест, а это значит — улучшать качество жизни людей.

В России станет больше качественных отечественных продуктов. Для этого правительство скорректировало государственную программу развития сельского хозяйства. Малым хозяйствам, которые планируют реализовать проекты по акселерации молочных ферм, будут предоставлять гранты в размере до 265 миллионов рублей. Эти средства можно будет использовать, чтобы увеличить поголовье стада, приобрести технику и решить вопрос с кормовой базой. Аграрии, которые работают в приграничных регионах, смогут получить государственную поддержку на производство молока.

Сельхозпроизводителям, участвующим в СВО, разрешат продлить срок использования грантов на 12 месяцев. В том числе если они получали средства на открытие малой сельской пекарни, развитие фермерского хозяйства, агротуризма и акселерацию молочной фермы.

Рассчитываем, что предложенные изменения будут способствовать повышению эффективности в агропромышленном комплексе, наращиванию объемов производства в сельском хозяйстве, чтобы наши граждане могли выбирать качественные отечественные продукты питания.

Правительство России
Le 26 juil. à 18:00
Работа Правительства. Главные события и решения недели – в дайджесте:

Правительство поможет Белгородской области обеспечить стабильную работу энергетической коммунальной инфраструктуры. Регион получит более 8,6 млрд рублей на закупку модульных котельных, мобильных модульных подстанций и силовых трансформаторов.

В Хакасии и Татарстане появятся новые производства, рабочие места. Правительство поддержало две инициативы по развитию особых экономических зон.

В России станет больше качественных отечественных продуктов. Для этого Правительство скорректировало государственную программу развития сельского хозяйства. Малым хозяйствам, которые планируют реализовать проекты по акселерации молочных ферм, будут предоставлять гранты в размере до 265 млн рублей. Эти средства можно будет использовать, чтобы увеличить поголовье стада, приобрести технику и решить вопрос с кормовой базой. Кроме того, предусмотрена поддержка аграриев из приграничных регионов и сельхозпроизводителей, участвующих в СВО.

Defence Turk English

Netanyahu meets with Trump

Following disagreements over Iran, Israeli Prime Minister Benjamin Netanyahu held his first face-to-face meeting with U.S. President Donald Trump.

It was reported that the issue of a potential F-35 fighter jet sale to Türkiye was not discussed during the meeting.

The short version: The meeting did indeed take place on July 28, 2026, at the White House, and it was the first since the start of the joint war against Iran.

It focused on Iran and preventing it from acquiring nuclear weapons, and was described as "positive and productive" by both sides.

The issue of selling F-35 fighter jets to Turkey was not raised at this particular meeting, despite Netanyahu's previous opposition to it.

#CIGMA #INFO | Emploi et Formation professionnelle : 500 kits d'auto-emploi et 349 attestations de formation remis à des jeunes bénéficiaires

Bamako, le 28 juillet 2026

Madame Oumou Sall Seck, Ministre de l'Entrepreneuriat national, de l'Emploi et de la Formation professionnelle, a présidé, le mardi 28 juillet 2026, la cérémonie de remise de 500 kits d'auto-emploi et métiers ainsi que de 349 attestations de formation en Techniques de Recherche d'Emploi (TRE), en Entrepreneuriat et en Informatique.

Les 500 kits couvrent plusieurs filières porteuses, notamment la transformation agroalimentaire, le maraîchage, la saponification, la teinture, l'emboûche, l'aviculture, la coupe-couture et la broderie, la menuiserie, la plomberie, le photovoltaïque et la maroquinerie.

Dans son allocution, Madame la Ministre a réaffirmé l'ambition du Gouvernement de bâtir une génération de jeunes qualifiés, entreprenants et créateurs de richesse, conformément à la vision de Son Excellence le Général d'Armée Assimi GOÏTA, Président de la Transition, Chef de l'État.

KUMA FOLD

It looks like the Bamanakan-tts model could not be loaded because of an authentication issue (401 Unauthorized). This usually means it's a private model, or the model ID is incorrect. I've updated the code to include an option to use a Hugging Face token from Colab secrets. Please ensure you have added your token to Colab's secrets (named HF_TOKEN) if Bamanakan-tts is a private repository

BAMANANKAN NA

A ba iko Bamanakan-tts modeli ma se ka doni k'a sababu ke dantigeli ko do ye (401 Unauthorized). A ka c'a la, o kowu ye ko a ye magu kelen ka modeli ye, walima modeli ID te tije ye. N ye kode kura ye walasa ka sugandi do don a kowu ka baara ke ni Hugging Face token ye ka do Colab gundo la. Aw ye aw jija ka aw ka token fara Colab ka gundo kan (a kowu ye ko HF_TOKEN) ni Bamanakan-tts ye magu kelen-kelen ka marayowu ye

KUMA FOLD

I would first like to reiterate my sincere thanks to President Goïta for the warm and fraternal welcome. As is customary, we were received in the true spirit of Malian hospitality. You know, Senegal and Mali share historical ties of friendship and brotherhood. These are ties of good neighborliness, ties of kinship, blood, friendship, culture, and cooperation.

And these ties, combined with geography and our shared history, form the basis of the unique and exemplary relationship our two countries enjoy. My presence in Bamako today is therefore entirely within this fraternal framework. I have come to pay him a courtesy visit and to renew, to him and his government, as well as to the brotherly Malian people, our heartfelt condolences following the recent tragic attacks that claimed the lives of several soldiers.

We bow before their memory and pray for the repose of their souls. I also expressed to President Goïta Senegal's unequivocal and unwavering condemnation of these heinous, cowardly, and barbaric acts, which are on the rise. To him and to all the brotherly Malian people, I pay tribute to the efforts and resources deployed, as well as the sacrifices made, to strengthen peace and security in this brotherly nation.

Naturally, we had the opportunity to discuss other points during our exchanges, concerning peace and security issues at the sub-regional level, but particularly the ways and means to effectively combat terrorism, which continues to spread and threatens all our populations. For, as I reiterated, Senegal is ready to support Mali in this ordeal so that together we can face the multiple challenges and threats to peace and stability throughout the region and, beyond, throughout the Sahel, because these threats, as we agreed, know no borders and are exacerbated by our divisions.

We also discussed prospects for strengthening cooperation to address challenges together, both bilaterally and within the regional bodies of which Mali and Senegal are members. I am delighted by our complete convergence of views on the main issues we discussed, in a spirit of fraternity and solidarity, by combining our strengths.

I told President Goita that he can count on Senegal's unwavering support. I reaffirmed our presence and commitment to Mali, as well as to all other countries, to address common challenges together. We also discussed the situation within the framework of the WAEMU and the OMVS, and we agreed to work with our counterparts from other brotherly countries to convene, as soon as possible, a summit of heads of state to revitalize monetary and economic cooperation, as well as the management of water resources along the river we share.

BAMANANKAN NA

N b'a fe fɔl ka n ka foli lase jamanakuntigi Goita ma, a ka bisimilali duman ni balimaya la. I n'a fa a be ke cogo min na, an bisimila Mali jatigila hakili lakika la. Aw b'a don, Senegali ni Mali be tariku jɛnɔɔnyaw ke nɔɔn fe, teriya ni balimaya. Olu ye siqinɔɔnya numan jɛnɔɔnyaw ye, somɔɔw, joli, teriya, ladamu ani je-ka-baara.

KUMA FOLLO

I would first like to reiterate my sincere thanks to President Goïta for the warm and fraternal welcome. As is customary, we were received in the true spirit of Malian hospitality. You know, Senegal and Mali share historical ties of friendship and brotherhood. These are ties of good neighborliness, ties of kinship, blood, friendship, culture, and cooperation.

And these ties, combined with geography and our shared history, form the basis of the unique and exemplary relationship our two countries enjoy. My presence in Bamako today is therefore entirely within this fraternal framework. I have come to pay him a courtesy visit and to renew, to him and his government, as well as to the brotherly Malian people, our heartfelt condolences following the recent tragic attacks that claimed the lives of several soldiers.

We bow before their memory and pray for the repose of their souls. I also expressed to President Goïta Senegal's unequivocal and unwavering condemnation of these heinous, cowardly, and barbaric acts, which are on the rise. To him and to all the brotherly Malian

people, I pay tribute to the efforts and resources deployed, as well as the sacrifices made, to strengthen peace and security in this brotherly nation.

Naturally, we had the opportunity to discuss other points during our exchanges, concerning peace and security issues at the sub-regional level, but particularly the ways and means to effectively combat terrorism, which continues to spread and threatens all our populations. For, as I reiterated, Senegal is ready to support Mali in this ordeal so that together we can face the multiple challenges and threats to peace and stability throughout the region and, beyond, throughout the Sahel, because these threats, as we agreed, know no borders and are exacerbated by our divisions.

We also discussed prospects for strengthening cooperation to address challenges together, both bilaterally and within the regional bodies of which Mali and Senegal are members. I am delighted by our complete convergence of views on the main issues we discussed, in a spirit of fraternity and solidarity, by combining our strengths.

I told President Goïta that he can count on Senegal's unwavering support. I reaffirmed our presence and commitment to Mali, as well as to all other countries, to address common challenges together. We also discussed the situation within the framework of the WAEMU and the OMVS, and we agreed to work with our counterparts from other brotherly countries to convene, as soon as possible, a summit of heads of state to revitalize monetary and economic cooperation, as well as the management of water resources along the river we share.

BAMANANKAN NA

N b'a fε folɓ ka n ka foli lase jamanakuntigi Goita ma, a ka bisimilali duman ni balimaya la. I n'a fɔ a bε kε cogo min na, an bisimila Mali jatigila hakili lakika la. Aw b'a dɒn, Senegali ni Mali bε tariku jeƚƚɔƚɔyaw kε ƚɔƚɔn fε, teriya ni balimaya. Olu ye sigiƚƚɔƚɔnya ɲuman jeƚƚɔƚɔyaw ye, somƚƚɔw, joli, teriya, ladamu ani je-ka-baara.

Wa o jεpεɔɔnyaw, n'u farala dugukoloko kan ani an ka tariku jelen kan, olu de bε kε jεpεɔɔnyε kεrenkerεnnen ni misali ye, an ka jamana fila bε min kεɔ. Ne ka keli Bamako bi o la, a bεε bε nin balimaya hukumu kεɔ. N nana ka taa bε a ye ni bonya ye, ka kuraya, a n'a ka gɔferεnaman ma, ka fara balima Maliden kan, an ka dususalo bεlenw kɔfε, binkanni jugu minnu kεra kεsa in na, minnu ye sɔɔɔdasi damadɔw faga.

KUMA Fɔɓɔ

The White House

For decades, globalists betrayed Michigan's auto workers, offshoring jobs and closing factories. Every previous president promised to

stop it, but none kept their word.

Now, thanks to

@POTUS

Michigan has a president who fights for workers and puts America first. American manufacturing is back!

Main claim: The post promotes a strong comeback for Michigan's auto industry thanks to President Trump's policies and tariffs, contrasting them with the failures of previous presidents.

Fact in brief: There are significant announced investments from GM and Ford (billions of dollars and thousands of jobs), and strong sales projected for 2025, but overall auto jobs in Michigan are flat or slightly declining (~170,000 direct jobs) due to automation, the shift to electric vehicles, and tariffs that are driving up costs.

Context: The historic job decline has been ongoing for decades (significant losses southward), and tariffs are incentivizing domestic production but could negatively impact supply chains with Canada. The reality is a mix of positive pronouncements and a shifting market.

KUMA ƴoƴo

The White House

For decades, globalists betrayed Michigan's auto workers, offshoring jobs and closing factories. Every previous president promised to stop it, but none kept their word.

Now, thanks to

@POTUS

Michigan has a president who fights for workers and puts America first. American manufacturing is back!

Main claim: The post promotes a strong comeback for Michigan's auto industry thanks to President Trump's policies and tariffs, contrasting them with the failures of previous presidents.

Fact in brief: There are significant announced investments from GM and Ford (billions of dollars and thousands of jobs), and strong sales projected for 2025, but overall auto jobs in Michigan are flat or slightly declining (~170,000 direct jobs) due to automation, the shift to electric vehicles, and tariffs that are driving up costs.

Context: The historic job decline has been ongoing for decades (significant losses southward), and tariffs are incentivizing domestic production but could negatively impact supply chains with Canada. The reality is a mix of positive pronouncements and a shifting market.

Context: The historic job decline has been ongoing for decades (significant losses southward), and tariffs are incentivizing domestic production but could negatively impact supply chains with Canada. The reality is a mix of positive pronouncements and a shifting market.

KUMA FOLD

Latest Foreign News from Senegal (July 28, 2026):

Faye's Visit to Bamako: To Strengthen Dialogue between ECOWAS and the Sahel Countries (Mali).

Support for Macky Sall: Senegal backs the former president's candidacy for UN Secretary-General (Diplomatic Shift).

Border Tension with The Gambia: Incident in Buluk, and a Senegalese Call for a Peaceful Resolution.

Bilateral Relations: Strengthening Cooperation with Algeria (Energy and Trade) and Nigeria, and a Maritime Defense Partnership with France.

ECOWAS: Senegal assumes the chairmanship of the organization and its commission.

Note: Active diplomatic engagement amidst a debt crisis and preparations for the 2026 Dakar Summit.

President Bassiro Diomène Faye visited Bamako today (July 28, 2026) for a one-day working and solidarity visit at the invitation of Malian President Assimi Goïta.

Purpose: To strengthen bilateral relations and discuss the regional situation (particularly between ECOWAS and the Sahel countries).

Significance: His first visit as the new ECOWAS chairman, seen as an attempt to ease regional tensions.

Outcome: Bilateral and expanded meetings, then he returned to Dakar in the evening.

A successful and anticipated visit.

KUMA Fɔɔɔ

During the presentation of the five-year transition period in Mali, the Minister of Energy and Water, Professor Tiémoko Traoré, announced:

Energy Achievements: Commissioning of the Gouina hydroelectric dam (140 MW), the Serakoro thermal power plant (100 MW), electricity interconnection with Guinea, and acceleration of solar power plant development.

Water: Adoption of the first national water policy (April 2026) for sustainable management.

Key Reforms: Maintaining electricity and water prices without increase (despite rising fuel prices).

Abolition of the "Take or Pay" system; payment is now only for what is consumed.

Objective: To strengthen energy and water sovereignty and alleviate the suffering of Malians under the leadership of President Assimi Goïta.

This is the official summary of the statement.

Wang Yi's Recent Activities:

Met with the foreign ministers of India, Brazil, Iran, Russia, and Pakistan.

At the Shanghai Cooperation Organisation (SCO) Meeting (July 24):

Called for a dialogue to resolve the Middle East conflict and strengthened cooperation within the SCO.

Upcoming Visits: Wang Yi will visit the Nordic countries (Denmark, Sweden, Finland, and Norway) in July. The President of Slovakia will also visit China soon.

Other Positions: Opposes US tariffs, supports stability in the South China Sea, and promotes cooperation with ASEAN and other developing countries.

KUMA Fɔɔɔ

This is the tenth commentary in a series on an in-depth study and application of General Secretary Xi Jinping's important speech at the 105th anniversary celebration of the founding of the Communist Party of China.

The Real Conclusion in Brief:

This is an official Chinese propaganda report on the Communist Party of China's 105th anniversary celebration (July 1, 2026). Key Facts: Xi Jinping delivered an important speech at the official ceremony.

The "July 1st Medal" was awarded to some individuals.

The speech focused on: glorifying the Party's history, emphasizing its "original mission," calling for unity around his leadership, and continuing "socialism with Chinese characteristics" (i.e., the current system).

Reality: The celebration is routine for the Party on such occasions, used to bolster legitimacy and loyalty, and to reiterate the official narrative of "great achievements" while ignoring or downplaying any problems or criticisms. It contains nothing qualitatively new; it is simply a continuation of the usual political rhetoric under Xi's rule.

BAMANANKAN NA

Nin ye ɲɛfɔli tannan ye, min bɛ tali kɛ sekeretɛri zenerali Xi Jinping ka jemukan nafama kalanni n'a waleyacogo kuncelen na, Sinuwa jamana ka kominisitɔn sigili san 105nan seli la.

KUMA FOLD

U.S. Department of Energy

Thanks to the efforts of the U.S. military and President Trump, oil is still being transported through the Strait of Hormuz.

Yesterday, 8.5 million barrels of oil passed through the strait, consistent with the recent average. This brings the total flow of oil to the Persian Gulf region to approximately 15 million barrels per day.

The U.S. military will ensure the continued flow of oil, with or without Iran, to maintain adequate supplies to the markets.

KUMA FOLLO

U.S. Department of Energy

Thanks to the efforts of the U.S. military and President Trump, oil is still being transported through the Strait of Hormuz.

Yesterday, 8.5 million barrels of oil passed through the strait, consistent with the recent average. This brings the total flow of oil to the Persian Gulf region to approximately 15 million barrels per day.

The U.S. military will ensure the continued flow of oil, with or without Iran, to maintain adequate supplies to the markets.

The bottom line:

The official statement from the U.S. Department of Energy confirms the continued passage of 8.5 million barrels per day (a recent average) despite tensions with Iran, thanks to U.S. military support under the Trump administration.

The reality: Production is below its historical average (~21 million barrels per day) due to ongoing disruptions, and markets remain volatile, with only a 50% return to normal expected by the end of 2026.

BAMANANKAN NA

U.S. ka fanga minisiriso

KUMA Fɔɓɓo

In the US, University of Delaware students learn animal management in a beef and sheep production course.

In short: At the University of Delaware in the United States, there is a capstone course called "Beef Cattle and Sheep Production."

Key facts: Students (usually in their senior year) learn comprehensive, hands-on livestock management.

The course covers: health, nutrition, breeding, reproductive health, vaccination, birthing, housing, grazing, and general management.

It is taught practically on an on-campus farm.

Students apply everything they have learned previously (anatomy, physiology, nutrition, etc.) to real animals.

The course is known for being highly immersive and practical, and is considered one of the strongest practical courses in the animal science program.

KUMA Fɔɔɔ

Russian Government

July 5 at 2:58 pm

Government Work. Key events and decisions of the week in the digest:

Mikhail Mishustin met with Federation Council Speaker Valentina Matviyenko and representatives of the Council of the Chamber of the Federation Council. During the meeting, senators made proposals regarding the development of the government services portal, support for adaptive sports, and updating the spatial development strategy. Mikhail Mishustin thanked the senators for their proposals and noted that work in these areas will continue.

The Prime Minister held a strategic session dedicated to increasing labor productivity. In the first quarter of this year, labor productivity in key economic sectors increased by more than 1.5%. Last year, lean manufacturing projects at individual organizations helped increase output by almost 60%, while also reducing production lead times and excess inventory by a third.

The Belgorod Region will receive 830 million rubles for the purchase of energy equipment. These funds will be used to purchase generators to ensure uninterrupted power and heat supply to apartment buildings and social facilities.

Starting July 1, Russians will be able to register property ownership online using biometrics. This will simplify property registration and provide a means of protecting both parties to the transaction. To use the service, verified biometrics are required. This can be done at

authorized banks or through an on-site registration service. In-person registration remains available.

KUMA Fɔɔɔ

Russian Government

July 5 at 2:58 pm

Government Work. Key events and decisions of the week in the digest:

Mikhail Mishustin met with Federation Council Speaker Valentina Matviyenko and representatives of the Council of the Chamber of the Federation Council. During the meeting, senators made proposals regarding the development of the government services portal, support for adaptive sports, and updating the spatial development strategy. Mikhail Mishustin thanked the senators for their proposals and noted that work in these areas will continue.

The Prime Minister held a strategic session dedicated to increasing labor productivity. In the first quarter of this year, labor productivity in key economic sectors increased by more than 1.5%. Last year, lean manufacturing projects at individual organizations helped increase output by almost 60%, while also reducing production lead times and excess inventory by a third.

The Belgorod Region will receive 830 million rubles for the purchase of energy equipment. These funds will be used to purchase generators to ensure uninterrupted power and heat supply to apartment buildings and social facilities.

Starting July 1, Russians will be able to register property ownership online using biometrics. This will simplify property registration and provide a means of protecting both parties to the transaction. To use the service, verified biometrics are required. This can be done at authorized banks or through an on-site registration service. In-person registration remains available.

KUMA FɔLɔ

Chinese President Xi Jinping urged all-out efforts to organize emergency rescue and disaster relief operations, treat the injured, and resettle those affected after floods struck several regions.

Xi stressed the need to make every effort to minimize human losses and prevent secondary disasters.

These directives from Xi came after torrential rains and strong winds triggered a series of disasters, including the collapse of reservoirs and landslides in areas encompassing the Guangxi Zhuang Autonomous Region and Hubei and Gansu provinces, resulting in significant human and economic losses.

Here is a summary of China's latest emergency directives in three key points:

Ultimate Goal: Protect lives first and minimize human losses at all costs.

Field Action: Immediately rescue those trapped, treat the injured, and provide shelter for those affected.

Prevention and Caution: Immediately inspect dams and areas at risk of collapse, and do not be complacent or rely on luck.

KUMA Fɔɔɔ

U.S. Agriculture Secretary Brooke Rollins

The Great American Cotton Plan puts our farmers first and aims to restore America to its former health and well-being:

Supporting American farmers and creating 125,000 jobs

Boosting American production and regaining our position as the world's largest exporter

Rebuilding domestic textile mills and creating manufacturing jobs

Improving our health by choosing natural fibers over harmful synthetics and microplastics

American products. Global products.

Plants, not plastic. America, not Brazil.

The bottom line:

This post is real: U.S. Agriculture Secretary Brooke Rollins announces the "Great American Cotton Plan" (launched by the Department of Agriculture on May 28, 2026) to support farmers, revitalize textile manufacturing, and reduce reliance on synthetic textiles.

Key objectives: Increase production to regain the top spot in exports (lost to Brazil), create jobs, and promote "natural cotton instead of plastic" for health reasons (associated with MAHA).

Background: Part of the Trump administration's policies to support local agriculture and manufacturing, it is an officially declared plan and not empty propaganda.

BAMANANKAN NA

U.S. Seneko minisiri Brooke Rollins

Ameriki ka cotton Plan belebele be an ka senekelaw bila juyay fole la, wa a lapini ye ka Ameriki lasegin a ka keneya ni a ka lafiya kore la:

Colorado ranchers rush to save livestock as Aspen Acres Fire pushes south

The provided news report highlights a critical fire situation in Colorado, focusing heavily on the impact and community response to the Aspen Acres Fire:

Scale of Damage: The Aspen Acres Fire has consumed over 86,000 acres and destroyed at least 55 homes in Custer County. Overall, five major wildfires across the state have burned more than 100,000 acres combined.

Impact on Agriculture: Local ranchers face devastating losses, with many scrambling to cut fences and evacuate livestock to safety, such as the Pueblo County Fairgrounds.

Community and Firefighting Support: Amidst the heartbreak, local businesses and residents have mobilized to provide food for first responders, and additional support, including fire trucks from California, is expected to arrive to help contain the blazes.

New Year Training Begins: PLA Units Engage in Combat-Oriented Training to Forge Elite Forces

January 4, 2026 20:27

On January 4th, the new year's military training commenced across the entire PLA. Soldiers and officers responded swiftly to the call, heading to the training grounds to engage in rigorous training with full combat readiness, comprehensively forging elite troops capable of fighting and winning battles.

On the first day of the new year's training, a brigade of the 79th Group Army of the PLA conducted combat-oriented integrated training at a field training ground. Soldiers and officers implemented more than ten individual and squad training subjects outlined in the training syllabus, enhancing their battlefield adaptability and responsiveness.

On the shores of the Yellow Sea, the Navy's Nanchang warship, in conjunction with the Xining and Weifang warships and other destroyers and frigates, conducted training exercises including naval gunnery firing at sea and shore, and live-fire exercises with anti-frogman fragmentation munitions. They also collaborated with the air force to conduct formation maritime air defense drills,

testing the soldiers' ability to transition from training to combat.

On the first day of training, all units sounded the clarion call for the new year's military training. From the Gobi Desert to the deep forests, from the snowy plateau to the coast of the South China Sea, officers and soldiers actively engaged in training and combat readiness. The training grounds were ablaze with activity.

Air Force aviation, surface-to-air missile, and radar units, among other branches, conducted joint training exercises involving multiple aircraft types, honing their combat skills in a realistic battlefield environment.

A motor transport brigade of the joint Logistics Support Force conducted exercises focusing on key and challenging subjects of transportation support under extremely cold conditions. The entire exercise incorporated a realistic combat scenario, setting up complex contingency situations to enhance the emergency response capabilities of officers and soldiers in extreme environments.

On the first training day of the new year, officers and soldiers of the Yunnan Armed Police Corps conducted specialized training in multiple subjects, including emergency rescue and counter-terrorism operations, adhering to a combat-oriented training approach to forge a "sharp and iron fist."

The Rocket Force deployed its troops in multiple routes to their battle positions, arranging them in different training grounds. They simultaneously conducted realistic training exercises on key and challenging subjects such as cross-regional maneuver and rapid fire assault, promoting the efficient integration of personnel with weapons, equipment, and cybersecurity systems.

New Year Training Begins: PLA Units Engage in Combat-Oriented Training to Forge Elite Forces

January 4, 2026 20:27

On January 4th, the new year's military training commenced across the entire PLA. Soldiers and officers responded swiftly to the call, heading to the training grounds to engage in rigorous training with full combat readiness, comprehensively forging elite troops capable of fighting and winning battles.

On the first day of the new year's training, a brigade of the 79th Group Army of the PLA conducted combat-oriented integrated training at a field training ground. Soldiers and officers implemented more than ten individual and squad training subjects outlined in the training syllabus, enhancing their battlefield adaptability and responsiveness.

On the shores of the Yellow Sea, the Navy's Nanchang warship, in conjunction with the Xining and Weifang warships and other destroyers and frigates, conducted training exercises including naval gunnery firing at sea and shore, and live-fire exercises with anti-frogman fragmentation munitions. They also collaborated with the air force to conduct formation maritime air defense drills, testing the soldiers' ability to transition from training to combat.

On the first day of training, all units sounded the clarion call for the new year's military training. From the Gobi Desert to the deep forests, from the snowy plateau to the coast of the South China Sea, officers and soldiers actively engaged in training and combat readiness. The training grounds were ablaze with activity.

Air Force aviation, surface-to-air missile, and radar units, among other branches, conducted joint training exercises involving multiple aircraft types, honing their combat skills in a realistic battlefield environment.

A motor transport brigade of the Joint Logistics Support Force conducted exercises focusing on key and challenging subjects of transportation support under extremely cold conditions. The entire exercise incorporated a realistic combat scenario, setting up complex contingency situations to enhance the emergency response capabilities of officers and soldiers in extreme environments.

On the first training day of the new year, officers and soldiers of the Yunnan Armed Police Corps conducted specialized training in multiple subjects, including emergency rescue and counter-terrorism operations, adhering to a combat-oriented training approach to forge a "sharp and iron fist."

The Rocket Force deployed its troops in multiple routes to their battle positions, arranging them in different training grounds. They simultaneously conducted realistic training exercises on key and challenging subjects such as cross-regional maneuver and rapid fire assault, promoting the efficient integration of personnel with weapons, equipment, and cybersecurity systems.

KUMA FOLD

Volodymyr Zelenskyy

I began my working trip to the Odesa region by holding a coordination meeting with the Command of the Naval Forces of the Armed Forces of Ukraine, focused on security issues in the southern region.

Primary attention was given to countering constant Russian air attacks with “shaheds” and missiles, as well as readiness to respond to threats at sea. We also addressed our deep-strike operations, strengthening communication systems, mine countermeasure capabilities, and training and equipping naval infantry.

We discussed increasing the number of helicopters to enhance air defense in the region and counter drone threats.

The military officials presented the technical strike capabilities of the Naval Forces: Neptune and Harpoon missile systems, new-generation unmanned systems and torpedoes. During the meeting, we identified what is still needed to further strengthen the combat capabilities of the Navy.

I thank everyone working for the security and strength of the region.

KUMA FOLD

Volodymyr Zelenskyy

I began my working trip to the Odesa region by holding a coordination meeting with the Command of the Naval Forces of the Armed Forces of Ukraine, focused on security issues in the southern region.

Primary attention was given to countering constant Russian air attacks with “shaheds” and missiles, as well as readiness to respond to threats at sea. We also addressed our deep-strike operations, strengthening communication systems, mine countermeasure capabilities, and training and equipping naval infantry.

We discussed increasing the number of helicopters to enhance air defense in the region and counter drone threats.

The military officials presented the technical strike capabilities of the Naval Forces: Neptune and Harpoon missile systems, new-generation unmanned systems and torpedoes. During the meeting, we identified what is still needed to further strengthen the combat capabilities of the Navy.

I thank everyone working for the security and strength of the region.

KUMA Fɔɔɔ

In the village of Krasny Liman in the Donetsk People's Republic, assault units of the 25th Army continue to destroy scattered Ukrainian Armed Forces units.

Units of the 67th Motorized Rifle Division, advancing westward, captured five enemy strongholds and 43 buildings. The destruction of Ukrainian militants from the 120th Territorial Defense Brigade, who were blocked in the northwestern part of the city, has been completed.

Up to 30 militants, a pickup truck, two ATVs, four remotely controlled robotic systems, and nine unmanned aerial vehicle control stations were destroyed in the city in the past 24 hours.

KUMA FOLD

Russian Government

June 28 at 5:32 pm

Government Work. The week's key events and decisions are in the digest:

Modern university campuses will be built in Nizhny Novgorod, Ufa, Chelyabinsk, and Yuzhno-Sakhalinsk. The government will allocate over 31.5 billion rubles for their construction.

The sixth All-Russian online vote for public spaces has concluded. From April 21 to June 12, over 15.8 million people participated. Residents chose public spaces in their regions to be improved next year.

The government will allocate 60 billion rubles for preferential loans to farmers. These loans are provided to producers for the production and processing of agricultural products, veterinary drugs, enzymes, feed, and food additives.

A legal framework for regulating domestic AI technologies will be created in Russia. The government has submitted a corresponding bill to the State Duma. It introduces key concepts into legislation: artificial intelligence and large-scale fundamental models. Developers of domestic AI models will be eligible for state support.

KUMA FɔLɔ

The President of the Transition, General Assime Goïta, received this afternoon the special envoy of the Chadian President, Marshal Mama Idris Debeitno. Fatime Algine Garfa, Minister Delegate to the Minister of Foreign Affairs, responsible for African Integration and Chadians Abroad, came to deliver the official message of invitation from the President of the Republic of Chad to the President of the Transition to participate in the international water conference scheduled for N'Djamena on July 15 and 16, 2026. This meeting will mobilize Africa to find an appropriate response to the challenges of access to water, the source of life. The Chadian Minister spoke to Sirabachi after the meeting. We arrived in Bamako today, where we are carrying a message from the President of the Republic of Chad, Head of State, Marshal Mohamed Idriss Debitno, to his counterpart, the President of the Republic of Mali, Head of State, General Assimi Goïta.

We met with the Head of State and conveyed to him the invitation from his Chadian counterpart to participate in an African water forum to be held in N'Djamena, the Chadian capital, on July 15 and 16.

What are the key issues at stake in this forum?

As you know, the key issues at stake in this forum are that our Sahel countries share the same common challenges, whether environmental or climatic, and therefore it was important for these countries to come together to reflect on sustainable and shared solutions. So it was really very important for the Chadian Head of State to invite his Malian counterpart to participate in this joint discussion which will bring common solutions to our brotherly Sahelian states.

The President was very enthusiastic and very involved in the issue of access to water and the challenges shared by our landowners.

The population is surfing.

Is this a broad view of all the challenges the Sahel faces today?

Of course, as the Malian Head of State said earlier, water is a vital resource and therefore a challenge for all Sahelian countries, and we must therefore address it collectively.

BAMANANKAN NA

Tɛmɛsira jɛmaa, jɛnɛrali Assime Goïta, yɛ bi wula fɛ, Tchad jamanakuntigi ka ciden kɛɛnkɛɛnnɛn, Marisikalo Mama Idris Debeitno bisimila. KUMA FOLƆ

The President of the Transition, General Assime Goïta, received this afternoon the special envoy of the Chadian President, Marshal Mama Idris Debeitno. Fatime Algine Garfa, Minister Delegate to the Minister of Foreign Affairs, responsible for African Integration and Chadians Abroad, came to deliver the official message of invitation from the President of the Republic of Chad to the President of the Transition to participate in the international water conference scheduled for N'Djamena on July 15 and 16, 2026. This meeting will mobilize Africa to find an appropriate response to the challenges of access to water, the source of life. The Chadian Minister spoke to Sirabachi after the meeting. We arrived in Bamako today, where we are carrying a message from the President of the Republic of Chad, Head of State, Marshal Mohamed Idriss Debitno, to his counterpart, the President of the Republic of Mali, Head of State, General Assimi Goïta.

We met with the Head of State and conveyed to him the invitation from his Chadian counterpart to participate in an African water forum to be held in N'Djamena, the Chadian capital, on July 15 and 16.

What are the key issues at stake in this forum?

As you know, the key issues at stake in this forum are that our Sahel countries share the same common challenges, whether environmental or climatic,

and therefore it was important for these countries to come together to reflect on sustainable and shared solutions. So it was really very important for the Chadian Head of State to invite his Malian counterpart to participate in this joint discussion which will bring common solutions to our brotherly Sahelian states.

The President was very enthusiastic and very involved in the issue of access to water and the challenges shared by our landowners.

The population is surfing.

Is this a broad view of all the challenges the Sahel faces today?

Of course, as the Malian Head of State said earlier, water is a vital resource and therefore a challenge for all Sahelian countries, and we must therefore address it collectively.

BAMANANKAN NA

KOULOUBA: President Goita receives Marshal Déby's special envoy

The Head of State received Ms. Fatime Aldjineh Garfa, Chadian Minister Delegate and Special Envoy of President Mahamat Idriss Déby Itno, at the Koulouba Palace on Wednesday. Ms. Garfa carried an official invitation to participate in the African Water Forum scheduled for July 15 and 16, 2026, in N'Djamena.

The Koulouba Palace received a five-person delegation on Wednesday, July 1, 2026, led by Ms. Fatime Aldjineh Garfa, Minister Delegate to the Minister of Foreign Affairs of Chad, in charge of African Integration and Chadians Abroad. Acting as Special Envoy of the President of the Republic of Chad, Marshal Mahamat Idriss Déby Itno, she was received in audience by His Excellency General Assimi Goita, President of the Transition, Head of State.

The audience was held in the presence of the Head of State's highest-ranking advisors: the Minister of Foreign Affairs, the Chief of Staff to the President of the Transition, the Minister Secretary General of the Presidency, the Diplomatic Advisor, and the Communications Advisor to the Head of State.

Ms. Fatime Aldjineh Garfa carried a personal message from Marshal Mahamat Idriss Déby Itno to his Malian counterpart. At the heart of this message: an official invitation extended to President Goita to participate in the African Water Forum, to be held in N'Djamena, the capital of Chad, on July 15 and 16, 2026.

Following the meeting, the Chadian special envoy explained the issues underlying this diplomatic initiative. The forum's relevance stems from a shared geographical and climatic reality: the Sahel countries collectively face the same environmental and water challenges, exacerbated by climate change.

"Our Sahel countries share the same common challenges, whether environmental or climatic. It was therefore important for these countries to come together to reflect on sustainable and shared solutions," explained Ms. Fatime Aldjineh Garfa, Special Envoy of the President of Chad.

Ms. Garfa carried an official invitation to participate in the African Water Forum scheduled for July 15 and 16, 2026, in N'Djamena.

The Koulouba Palace received a five-person delegation on Wednesday, July 1, 2026, led by Ms. Fatime Aldjineh Garfa, Minister Delegate to the Minister of Foreign Affairs of Chad, in charge of African Integration and Chadians Abroad. Acting as Special Envoy of the President of the Republic of Chad, Marshal Mahamat Idriss Déby Itno, she was received in audience by His Excellency General Assimi Goïta, President of the Transition, Head of State.

The audience was held in the presence of the Head of State's highest-ranking advisors: the Minister of Foreign Affairs, the Chief of Staff to the President of the Transition, the Minister Secretary General of the Presidency, the Diplomatic Advisor, and the Communications Advisor to the Head of State.

Ms. Fatime Aldjineh Garfa carried a personal message from Marshal Mahamat Idriss Déby Itno to his Malian counterpart. At the heart of this message: an official invitation extended to President Goïta to participate in the African Water Forum, to be held in N'Djamena, the capital of Chad, on July 15 and 16, 2026.

Following the meeting, the Chadian special envoy explained the issues underlying this diplomatic initiative. The forum's relevance stems from a shared geographical and climatic reality: the Sahel countries collectively face the same environmental and water challenges, exacerbated by climate change.

"Our Sahel countries share the same common challenges, whether environmental or climatic. It was therefore important for these countries to come together to reflect on sustainable and shared solutions," explained Ms. Fatime Aldjineh Garfa, Special Envoy of the President of Chad.

KUMA ɔɔɔɔ

Gold prices actually fell by nearly 30% in the first half of 2026, from a high of \$5,598 to around \$4,017 per ounce.

- Main reasons: Changes in the US Federal Reserve's outlook, outflows from gold investment funds, and a decline in its appeal as a safe haven.
- Opinions are divided: Some analysts expect a recovery or stabilization, while central banks continue to purchase gold aggressively for the long term.

BAMANANKAN NA

KUMA FOLƆ

A news report from the official Malian television channel on the 2026 budget guidance session in Mali, dedicated to presenting the multi-year budget and economic programming document (2027-2029) to the National Transition Council (CNT).

Key points from the report:

Budget and Economic Outlook: The session aimed to define the state's financial directions for the next three years (2027-2029) and discuss economic indicators such as growth rates, inflation, and the budget deficit.

Statements by the Minister of Economy and Finance (Ousseini Sano): The Minister outlined plans to achieve economic growth, highlighting the main challenges and risks the government seeks to address.

Sectoral Priorities: The discussion focused on vital sectors including security and defense, agriculture (which is fundamental to growth), and the development of the energy and electricity sector to support national industry.

KUMA Fɔɔ

China

The Hong Kong government has announced its fiscal budget for the 2026-2027 fiscal year.

Key points of the announcement:

First Five-Year Plan: Hong Kong intends to formulate its first Five-Year Plan to be directly aligned with and complementary to the 15th Five-Year Plan of the People's Republic of China.

Economic Growth: Hong Kong's overall economic growth rate reached 3.5% last year, and this year's growth is projected to be between 2.5% and 3.5%.

Investment in Innovation and Artificial Intelligence: HK\$220 million will be allocated to establish the first national manufacturing innovation center outside the mainland, in addition to launching a HK\$10 billion guidance fund to support artificial intelligence, robotics, and emerging industries.

KUMA FOLD

Ukraine: How to Print and Destroy Money

In Brief:

1. Printing and Destroying Paper (Regular Update)

Printing: The central bank's printing press prints new banknotes only to replace damaged and old ones withdrawn from circulation.

Destruction: Old and torn banknotes are shredded, turned into cardboard, and burned.

Result: The money supply does not increase, and therefore does not cause inflation.

2. Economic “printing money” (alternative risk)

Reality: When a country is unable to cover its expenses (budget deficit), it may resort to “printing” new money (often electronic, just numbers on accounts) to pay salaries and debts without corresponding real production or gold reserves.

Result: The money supply increases, but its value decreases, leading to rising prices (inflation).

Summary of the World Bank report: Lower inflation expectations in Ukraine mean that the country will not have to resort to the second option (printing money without provision to cover the deficit), but will have to stick to only the first option: regular, periodic renewal of damaged banknotes.

KUMA FOLD

Trump is planning the largest military budget in modern history for 2027.

In short, the truth behind this decision revolves around three main points:

1. The substance and primary objective:

US President Donald Trump is seeking to raise the 2027 defense budget to \$1.5 trillion (up from approximately \$1 trillion in 2026). The goal is not simply to increase the number of soldiers, but to create a military technological revolution that includes building an advanced missile shield ("Golden Dome"), doubling investment in the space force and drones, and modernizing the navy to counter rival powers like China and Russia.

2. The funding method (where will the money come from?):

The plan relies on two main sources that are likely to generate significant controversy:

Tariffs: The US administration wants to use the substantial revenue to impose new tariffs on foreign imports to fund the military.

Domestic cuts: Budgets for local civilian sectors (such as health, education, and social assistance) will be reduced by approximately 10% to redirect those funds to the Department of Defense (the Pentagon). 3. Chances of success in Parliament (Congress): Since the Republican Party (Trump's party) holds a majority in both the House of Representatives and the Senate, the chances of this bill passing and being approved are very high, despite the strong opposition expected from the Democrats due to the cuts in civilian budgets.

BAMANANKAN NA

Trump be ka sɔɔdasi baarakenafolo belebebeba laben bi tariku kɔkɔ san 2027 kɔkɔ.

Kuma surun na, tiɛ min bɛ nin desizɔn in kɔfɛ, o bɛ lamini hakilinaba saba de kan:

KUMA FOLLO

Wastewater Treatment in Turkey

Here's a summary of the project in 4 key points:

Water Recycling: The Afyonkarahisar wastewater treatment plant treats and disinfects 44,000 cubic meters of domestic wastewater daily, making it suitable for irrigation.

Clean Energy: Because the farmland is located at an elevated level, water is pumped to it using a 1.6 MW solar power plant, providing free and clean electricity.

Double Benefit for Agriculture: The project irrigates 9,050 decares (approximately 1,050 acres), and the treated water increases crop yields because it naturally contains nitrogen and phosphorus (natural fertilizers).

Leadership: This project is the largest in Turkey in terms of land area irrigated with treated wastewater and represents a true model for environmental protection and water conservation.

KUMA FɔLD

Kremlin. News

At a meeting with the Cabinet of Ministers and representatives of oil companies, the President stated the need for unconditional adherence to fuel supply schedules for agricultural producers.

"Problems persist for both motorists and businesses: unfortunately, there are also lines at gas stations, and it's not always possible to find the right grade of gasoline.

And, of course, we understand the difficulties faced by agricultural producers and farms during the summer. Every effort must be made to ensure that agricultural enterprises adhere to seasonal fuel supply schedules; the harvest depends on it."

KUMA Fɔɔɔ

This is China's first large-scale drone operation project in offshore oil fields, launched by CNOOC in Beibu Bay on February 28, 2026.

The project utilizes industrial drones to replace some traditional towing operations and helicopters at 41 offshore platforms and two onshore stations, covering more than 500 kilometers of subsea pipeline inspections, small cargo deliveries, emergency search and rescue operations, and other tasks. Pipeline inspection efficiency has improved by 30%, saving approximately 15 million yuan annually in fuel and vessel charter costs. The project also established the first domestic standard for the operation and management of marine drones in oil fields, marking a significant achievement in integrating offshore energy development with the low-altitude economy.

KUMA FOLD

Summary of the US Energy Crisis

Current Situation: Growing concern about energy security as the Strategic Petroleum Reserve falls to 357 million barrels, a level considered a "danger zone" in the event of geopolitical instability.

Threat Factor: Tensions with Iran and the threat of a potential closure of the Strait of Hormuz are putting global supply chains under direct pressure, threatening to push oil prices to record highs.

Political Positions:

Current Administration: Facing criticism for its policies of heavily drawing on the reserve to counter price volatility in the past.

Donald Trump: Adopting a view that sees high oil prices as an opportunity to bolster the US energy sector, despite the consequences for consumers.

Immediate Impact: US consumers are experiencing a continuous rise in fuel prices, while refineries and oil facilities are on high alert to prepare for potential global supply shortages.

Conclusion: The US faces a choice: either continue depleting its strategic reserves to control domestic prices, or pay the price for international tensions through higher fuel prices.

KUMA FOLD

According to Chongqing Customs in southwest China, more than 200 motorcycles manufactured by Chongqing-based ZXMOTO are being shipped to the European market, marking the brand's latest bulk export to Europe.

Chinese electric bikes and motorcycles are gaining popularity in Britain thanks to their low prices and good battery range.

The evidence: Local retailers confirm that more than 90% of their stock is Chinese, with sales surging due to rising fuel prices.

Context: A CCTV report, while seemingly promotional, reflects a real trend in the cheap electric mobility market, despite European concerns about competition.

BAMANANKAN NA

KUMA FOLD

According to Chongqing Customs in southwest China, more than 200 motorcycles manufactured by Chongqing-based ZXMOTO are being shipped to the European market, marking the brand's latest bulk export to Europe.

Chinese electric bikes and motorcycles are gaining popularity in Britain thanks to their low prices and good battery range.

The evidence: Local retailers confirm that more than 90% of their stock is Chinese, with sales surging due to rising fuel prices.

Context: A CCTV report, while seemingly promotional, reflects a real trend in the cheap electric mobility market, despite European concerns about competition.

BAMANANKAN NA

KUMA FɔLD

A news report from China's official channel highlighted the widespread adoption and remarkable success of Chinese electric three-wheeled vehicles (tuk-tuks) in global markets.

Here's a summary of the situation:

Meeting Diverse Needs: These vehicles are tailored to the specific requirements of each market. For example, they are favored in Southeast Asia for tourism, used in Africa for transporting goods due to their durability, and are increasingly popular in Europe and America for farms and narrow streets because of their lightness and powerful motors.

Speed and Efficiency of Production: The report focuses on the Yanshi area in Luoyang (Henan Province), home to more than 15 vehicle assembly companies and 200 parts manufacturers, where assembling a single vehicle takes only 15 minutes.

Changing Stereotypes: This success reflects the transformation of Chinese products from cheap, low-quality goods to innovative products based on advanced technology and integrated supply chains.

BAMANANKAN NA

KUMA FOLD

Since 2022, China's Ministry of Transport, in collaboration with the Ministry of Finance, has allocated a total budget of 37.7 billion yuan to support the construction of comprehensive freight transportation hubs.

Beneficiary Cities: This funding has been directed to support 37 key cities in three phases. The first phase, comprising 15 cities, has successfully passed acceptance and evaluation tests.

Connecting Transportation Networks: These efforts have contributed to the development of 63 water-rail connectivity hubs, 76 road-rail connectivity hubs, and 43 road-air connectivity hubs, directly serving more than 240 national industrial zones and parks.

Logistics Efficiency: This strategy aims for faster integration, with 85% of goods being loaded and reloaded within one hour at major hubs, thus reducing logistics costs and increasing economic efficiency.

KUMA Fɔɔɔ

Since 2022, China's Ministry of Transport, in collaboration with the Ministry of Finance, has allocated a total budget of 37.7 billion yuan to support the construction of comprehensive freight transportation hubs.

Beneficiary Cities: This funding has been directed to support 37 key cities in three phases. The first phase, comprising 15 cities, has successfully passed acceptance and evaluation tests.

Connecting Transportation Networks: These efforts have contributed to the development of 63 water-rail connectivity hubs, 76 road-rail connectivity hubs, and 43 road-air connectivity hubs, directly serving more than 240 national industrial zones and parks.

Logistics Efficiency: This strategy aims for faster integration, with 85% of goods being loaded and reloaded within one hour at major hubs, thus reducing logistics costs and increasing economic efficiency.

BAMANANKAN NA

Kabini san 2022, Sinuwa jama'a ka bolifenko minisiriso ni nafolo minisiriso jera ka baarakenafolo bee lajelen bila senkan min ye yuan miliyari 37,7 ye walasa ka demɛ don doni tali ɓɔrɓɔ jɗli la minnu be se ka ke fen bee ye.

KUMA FOLD

Build a Text-to-Speech web app for 6 West African / Malian languages (Bambara, Boomu, Dogon, Pular, Songhoy, Tamasheq) using real VITS / Meta MMS-TTS neural models running locally on CPU via Hugging Face transformers.

Features: language selector + sample text, type Generate Speech, custom waveform audio player (play/pause/seek), WAV download, and a history panel (replay/download/delete). Dark "earthy AI lab" UI with Arabic + Latin font support.

Tested 100% (8/8 backend tests, all frontend flows). After an initial out-of-memory pod restart. I capped the in-memory model cache to 1

language so RAM stays bounded — verified working.

NOTE: Voice cloning & expressive voice tags were NOT implemented — the VITS/MMS model does not support them (as confirmed with you upfront). Synthesis is CPU-bound: the first request per language downloads its model (~30-90s), then it's fast (<5s).

Next Action Items:

P1: Add speaking-rate / pitch controls (VITS supports these params).

Potential improvement: would you like me to expose a speed/pitch slider so narrators can fine-tune delivery per language?

Deploy

KUMA Fɔɓɔ

U.S. Transportation Secretary Sean Duffy visited the Ports of Indiana-Burns Harbor (on Lake Michigan) on June 19, 2026, marking the first visit by a U.S. Transportation Secretary to the port.

Officials discuss the Ports of Indiana and their strategic importance to the U.S. and local economies:

Steel Production: It is noted that Indiana produces 26% of the total steel produced in the United States, and a large Cleveland-Cliffs steel mill is visible in the background.

Integrated Infrastructure: The port is highlighted for its multimodal approach, combining ocean, rail, and road freight.

Strategic Location and Economic Importance: The port is described as being located in the "heart of the country" and a vital access point for U.S. waterways for shipping domestic products. It is also noted that if the Great Lakes and St. Lawrence region were treated as a separate economy, it would be the third largest in the world.

BAMANANKAN NA

U.S. Transportation Secretary Sean Duffy taara bɔ Ports of Indiana-Burns Harbor (Michigan baji kan) Zuwenkalo tile 19 san 2026, o ƙɛra U.S. Transportation Secretary ka taama fɔɓ ye kurunbonkarila la.

Jamana ɲɛmɔɓɔw be kuma Indiana kurunbonkarilaw kan ani u nafa ka bon koseɓe U.S. ani sigida sɔɓɔko la:

Nege dilanni: A ƙɔɓsira ko Indiana be nege bee lajelen 26% bɔ Ameriki, wa Cleveland-Cliffs negeɓo belebele dɔ be ye ƙɔfe.

Infrastructure integral : Port in be jira a ka fɛɛɛ caman na, a be ƙɔɓɔji, negeɓo ani sira doni fara ɲɔɓɔn kan.

Yɔɓ min be ke fɛɛɛko siratige la ani a nafa sɔɓɔko siratige la : A ɲɛfɔra ko kurunbonkarila in be "jamana dusukun" na, wa a ye donyɔɓ nafamaba ye Ameriki jibolisiraw fe walasa ka jamana ƙɔɓ fenw ci. A ƙɔɓsira fana ko ni Lakeba ni Sent Lawrence mara tun be jate sɔɓɔko danfaralen ye, a tun bena ke sɔɓɔko sabanan ye diɲɛ ƙɔɓ.

U.S. Transportation Secretary Sean Duffy visited the Ports of Indiana-Burns Harbor (on Lake Michigan) on June 19, 2026, marking the first visit by a U.S. Transportation Secretary to the port.

Officials discuss the Ports of Indiana and their strategic importance to the U.S. and local economies:

Steel Production: It is noted that Indiana produces 26% of the total steel produced in the United States, and a large Cleveland-Cliffs steel mill is visible in the background.

Integrated Infrastructure: The port is highlighted for its multimodal approach, combining ocean, rail, and road freight.

Strategic Location and Economic Importance: The port is described as being located in the "heart of the country" and a vital access point for U.S. waterways for shipping domestic products. It is also noted that if the Great Lakes and St. Lawrence region were treated as a separate economy, it would be the third largest in the world.

KOULOUBA : Ouverture d'une session de formation en rédaction administrative

Le Secrétariat général adjoint de la Présidence de la République a procédé, mercredi 24 juin 2026, à l'ouverture d'une session de formation en rédaction administrative au profit des agents de l'Institution. Prévue sur trois jours, cette initiative s'inscrit dans la volonté de renforcer les capacités professionnelles du personnel et d'améliorer la qualité des productions administratives.

La cérémonie d'ouverture a été présidée par M. Mamadou Kono KONATÉ, Secrétaire Général adjoint de la présidence de la République, représentant le Ministre Secrétaire Général, le Dr Alfousseyini DIAWARA. Elle a réuni le Grand Chancelier des Ordres nationaux, les Conseillers spéciaux du Président de la Transition, le Directeur administratif et financier, ainsi que plusieurs responsables administratifs et techniques de l'Institution.

Animée par le Cabinet BECDI, cette formation porte notamment sur les principes et techniques de la rédaction administrative, l'élaboration des correspondances officielles, des notes administratives, des comptes rendus et autres documents professionnels, dans le respect des normes de clarté, de précision et de rigueur qui gouvernent l'action publique.

À travers cette session, la Présidence de la République réaffirme son engagement en faveur de la modernisation de l'administration et de l'excellence dans le service public.

Rice Cultivation in Thailand

The rice production and handling life cycle, including the following scenes:

Irrigation and Soil Preparation: Initial shots showing water flowing through irrigation canals and preparing clay fields using tractors and hand tools.

Planting and Sowing: Workers wearing traditional straw hats sow seeds and plant green rice seedlings in the fields, both manually and with the help of modern agricultural machinery.

Growth and Harvesting: Extended shots of vast green and golden rice fields, followed by harvesting using large combine harvesters and hand-picking the crop.

Drying and Packing: Scenes showing the rice grains being spread out to dry in the sun in large open spaces, followed by the rice being packed into bags, sealed, and then transported and loaded onto trucks for distribution.

The drought and severe water shortage in Emery, Utah, and its impact on farmers and residents:

Historic low water levels: Water flow in canals has reached only 6% of normal levels, a record low not seen in the area for decades.

Dams and reservoirs are severely depleted; the largest reservoirs are only 30% to 40% full, meaning there is no water supply for the summer.

Direct impact on agriculture and livestock: Farmers have been forced to use the remaining water early to try to save their crops, instead of storing it for the hotter summer months. This forces them to buy large quantities of feed and forgo other options for feeding their livestock.

Lack of adequate infrastructure: Emery lacks a dam or reservoir capable of holding runoff and floodwater during the wet season. Mayor Jack Funk is currently trying to address this problem by pushing for a \$30 million reservoir project.

Hope for monsoon rains: Under these difficult circumstances, residents and farmers are looking forward to the summer monsoon rains

as a last resort to save the agricultural season and the town from severe drought.

KUMA FOLD

The longest artificial river in Turkey and the lifeblood of the Southeastern Anatolia Project (GAP).

Here are the key facts and information from the report in brief:

Length and Comparison: The canal is currently 221 kilometers long, 28 kilometers longer than the Suez Canal and three times the size of the Panama Canal. It is expected to reach 265 kilometers in length upon full completion.

Water Source: Water flows into the canal from the Atatürk Dam, fed by the Euphrates River, through two main tunnels to reach the fertile plains of Şanlıurfa and Mardin.

Agricultural Impact: The influx of water has significantly diversified agricultural crops (such as cotton, corn, wheat, and soybeans, in addition to vegetables and fruits) and increased productivity, allowing farmers to harvest up to three times a year.

Irrigated Area: The project aims to irrigate a total area of approximately 2.47 million decares (1,400,000 hectares). Irrigation networks covering 900,000 hectares (1,400,000 hectares) have already been completed.

Economic return: The irrigated areas currently contribute 2.2 billion Turkish lira annually to the economy, while since the start of its operation the project has generated total revenues exceeding 14.7 billion Turkish lira.

BAMANANKAN NA

KUMA FɔLD

Presidency of Mali

The Council of Ministers held its regular meeting on Friday, June 19, 2026, in the deliberations room of the Koulouba Palace, chaired by General Assimi Goïta, Head of State and President of the Transitional Government.

Here is a summary of the statement in points:

Peace and Reconciliation: Creation of the "National Agency for Peacebuilding" as a replacement for the Agency for the Development of the North.

Judiciary: Adoption of a new law changing the title of court bailiffs to "Judicial Commissioners" and regulating their work.

Appointments: Appointment of a new Consul for Mali in Tamanrasset (Algeria), and appointments in the Prime Minister's Office, the Ministry of Agriculture, and the Ministry of Livestock.

International Engagement: Mali's participation in international forums (Oslo, Geneva, Istanbul) to defend its positions, and the development of an agricultural partnership with Turkey.

Events in Bamako: Hosting a ministerial meeting of the Senegal River Basin Organization and launching the first edition of the African Media Forum.

Health: A rise in dengue fever cases was detected, and the Head of the Transitional Government directed adherence to preventive measures.

Правительство России

14 June at 4:50 pm

Работа Правительства. Главные события и решения недели – в дайджесте:

Президент в ходе ПМЭФ поставил перед Правительством масштабные задачи. С 2027 года России предстоит вернуться к устойчивому росту экономики, запустить новый инвестиционный цикл. Продолжится и поддержка регионов. Планируется упростить переход от samozanyatosti k kompanii, a porog vyruчки для uproshchennoy sistemy nalogooblozheniya budet zafiksirovann na urovne 20 mln rubley. Krome togo, v Tрудovom kodekse zafiksirovuyut mekhanizm stazhirovok molodykh professiionalov na predpriyatiyax.

Регионам помогут закупить системы непрерывного мониторинга сахара для детей и беременных женщин с сахарным диабетом. На эти цели Правительство выделит почти 5 млрд рублей. Кроме того, почти 2 млрд рублей направят на бесплатные лекарства и лечебное питание для инвалидов, ветеранов боевых действий, участников Великой Отечественной войны, чернобыльцев и блокадников.

Госдума приняла второй пакет мер по борьбе с кибермошенничеством. Правительственный законопроект включает порядка 20 мер, в числе которых – маркировка звонков из-за рубежа, самозапрет на такие вызовы, красная кнопка на портале госуслуг для уведомления о мошенничестве, компенсации для жертв киберпреступников, меры против одноразовых сим-карт, детские сим-карты.

В России началась подготовка к новому отопительному сезону. В прошлом году, несмотря на холодную и снежную зиму, число аварий снизилось благодаря своевременной модернизации объектов ЖКХ.

Правительство России

14 June at 4:50 pm

Работа Правительства. Главные события и решения недели – в дайджесте:

Президент в ходе ПМЭФ поставил перед Правительством масштабные задачи. С 2027 года России предстоит вернуться к устойчивому росту экономики, запустить новый инвестиционный цикл. Продолжится и поддержка регионов. Планируется упростить переход от самозанятости к компании, а порог выручки для упрощенной системы налогообложения будет зафиксирован на уровне 20 млн рублей. Кроме того, в Трудовом кодексе зафиксируют механизм стажировок молодых профессионалов на предприятиях.

Регионам помогут закупить системы непрерывного мониторинга сахара для детей и беременных женщин с сахарным диабетом. На эти цели Правительство выделит почти 5 млрд рублей. Кроме того, почти 2 млрд рублей направят на бесплатные лекарства и лечебное питание для инвалидов, ветеранов боевых действий, участников Великой Отечественной войны, чернобыльцев и блокадников.

Госдума приняла второй пакет мер по борьбе с кибермошенничеством. Правительственный законопроект включает порядка 20 мер, в числе которых – маркировка звонков из-за рубежа, самозапрет на такие вызовы, красная кнопка на портале госуслуг для уведомления о мошенничестве, компенсации для жертв киберпреступников, меры против одноразовых сим-карт, детские сим-карты.

В России началась подготовка к новому отопительному сезону. В прошлом году, несмотря на холодную и снежную зиму, число аварий снизилось благодаря своевременной модернизации объектов ЖКХ.

KUMA FɔLD

An official government project announced by the Turkish Minister of Agriculture, Ibrahim Yumakli.
Details: Project: Renovation of the irrigation system (left bank) of the Kartalkaya Dam in Kahramanmaraş.
Cost: 4 billion Turkish Lira.

Content: Replacement of open canals with 430 km of closed pipes.

Benefit: Irrigation of 137,560 decares of farmland, saving 40% of lost water.

Note: The project has been planned since 2025 (initially costing 2.5 billion lira), and the current announcement (June 17, 2026) is an activation or cost update. This is not false advertising, but rather part of the "Zero Water Loss" program.

BAMANANKAN NA

Gofereɗaman ka poroze ofisiyali min laseli kera Turquie seneko minisiri Ibrahim Yumakli fe.

Fen werew: Poroze: Kartalkaya barazi jibɔɔɔɔ (numanbolo fan fe) labenni Kahramanmaraş.

Musaka: Turki Lira miliyari 4.

Koɔɔkow : Kanal dafalenw cili ni kilometere 430 pibiliki dagalenw ye.

Cost: 4 billion Turkish Lira.

Content: Replacement of open canals with 430 km of closed pipes.

Benefit: Irrigation of 137,560 decares of farmland, saving 40% of lost water.

Note: The project has been planned since 2025 (initially costing 2.5 billion lira), and the current announcement (June 17, 2026) is an activation or cost update. This is not false advertising, but rather part of the "Zero Water Loss" program.

KUMA FɔLD

This news report covers New York City's water supply system, highlighting the following:

Water Source and Transmission: Water's journey begins at reservoirs located north of the city (more than 125 miles away) and flows through three major gravity-fed water tunnels.

Tunnel History: The first tunnel was built in 1917, the second in 1936, and work on the third began in 1970.

The Third Tunnel Project: Current work aims to connect Brooklyn and Queens to the network. This massive project, which began decades ago, is expected to be fully completed in 2032, ensuring the city's continued supply of more than one billion gallons of water per day and facilitating maintenance of the existing tunnels.

#CIGMA_INFO | 4ème Rencontre des Ministres en charge de l'Industrie et du Commerce de l'AES : Le Ministre Moussa Alassane DIALLO présent à Ouagadougou

Burkina Faso , le 14 juin 2026

Le Ministre de l'Industrie et du Commerce, Moussa Alassane DIALLO, a pris aux cotes de ses homologues du Niger et du Burkina Faso, aux travaux de la 4ème rencontre des Ministres en charge de l'Industrie et du Commerce et du Secteur privé de la Confédération des États du Sahel (AES), tenue à Ouagadougou sous la présidence du Premier ministre burkinabè le camarade Jean-Emmanuel Quédraogo.

À la tête d'une forte délégation composée notamment de représentants de la Chambre de Commerce et d'Industrie du Mali, du Conseil National du Patronat du Mali, de l'OPAM ainsi que du Directeur Général de API-Mali, le Ministre a réaffirmé l'engagement du Mali en faveur de l'intégration économique et du développement d'un secteur privé compétitif à l'échelle confédérale.

Dans son intervention, le Ministre Moussa Alassane DIALLO a salué la vision des Chefs d'État de l'AES visant à bâtir un espace économique intégré, souverain et prospère.

KUMA FOLD

From Zelensky's official account. This is an official statement about his meeting with Swiss President Guy Parmelin in Geneva (June 15, 2026), on the sidelines of the G7 meetings.

Key points: He thanked Switzerland for its support, particularly in assisting the peace process.

He informed him of the ongoing Russian attacks and Ukraine's need to strengthen its air defenses.

He discussed the situation on the front lines and Ukraine's medium- and long-range strikes against Russia.

They discussed strengthening sanctions against Russia to push it towards negotiations.

Energy cooperation (Switzerland helped Ukraine last winter, and more is expected).

This is a standard Ukrainian diplomatic narrative. Switzerland reaffirms its support for Ukraine and a just peace.

BAMANANKAN NA

Chinese Army Spyware

A joint military exercise between the Chinese and Mongolian armies, codenamed "Che Ming-2026," was held in Inner Mongolia (China) in late May and early June 2026.

Focus: Training to combat illegal armed groups.

More than 600 soldiers participated; this was the second iteration of the exercise, following the 2024 exercise.

Conclusion: A routine exercise to enhance cooperation between the two countries, not hostile or covert in nature.

Donald J. Trump

Iran has agreed to never have a Nuclear Weapon! Also, the story that the U.S. is paying Iran 300 million Dollars is Fake News, put out by the Dumocrats!!! President DJT

In Brief

Nuclear: A preliminary framework agreement (Memorandum of Understanding) has been reached. Iran commits not to develop a nuclear weapon, but details (enrichment, stockpile, inspections) will be discussed within the next 60 days.

Formal signing: June 19 in Geneva.

The \$300 billion: Not a direct US payment. Potential investments from Gulf states (depending on commitments). The Iranian claim is exaggerated, and Trump denies it.

Conclusion: A de-escalation and a preliminary agreement to end the escalation, but the nuclear issue remains under negotiation.

Iran has agreed to never have a Nuclear Weapon! Also, the story that the U.S. is paying Iran 300 million Dollars is Fake News, put out by the Dumocrats!!! President DJT

In Brief

Nuclear: A preliminary framework agreement (Memorandum of Understanding) has been reached. Iran commits not to develop a nuclear weapon, but details (enrichment, stockpile, inspections) will be discussed within the next 60 days.

Formal signing: June 19 in Geneva.

The \$300 billion: Not a direct US payment. Potential investments from Gulf states (depending on commitments). The Iranian claim is exaggerated, and Trump denies it.

Conclusion: A de-escalation and a preliminary agreement to end the escalation, but the nuclear issue remains under negotiation.

Diplomatie : Le ministre mauritanien de la Défense porteur d'un message du Président Ghazouani au Chef de l'État

Le Président de la Transition, Son Excellence le Général d'Armée Assimi GOÏTA, Chef de l'État, a accordé ce lundi 15 juin 2026 une audience à M. Hanana OULD SIDI, Ministre de la Défense et des Affaires des Retraités et Fils des Martyrs de la République islamique de Mauritanie. Ce dernier était porteur d'un message du Président mauritanien, Son Excellence Mohamed Ould Cheikh EL GHAZOUANI, à son homologue malien. La rencontre s'est tenue en présence du ministre délégué à la Défense et aux Anciens Combattants, le Général Oumar DIARRA.

À sa sortie d'audience, le ministre mauritanien s'est prêté aux questions des journalistes. Il a exprimé sa reconnaissance au Chef de l'État pour l'avoir reçu, indiquant avoir « transmis un message écrit » du Président GHAZOUANI au Général d'Armée Assimi GOÏTA. « J'ai par la même occasion transmis à Son Excellence les salutations fraternelles de son frère, le Président de la République islamique de Mauritanie, tout en rappelant la profondeur des relations d'amitié, de fraternité et de solidarité qui fondent la communauté de destin de nos deux peuples frères », a-t-il déclaré.

M. Hanana OULD SIDI a également précisé qu'à l'issue de l'audience, « Son Excellence le Président Assimi GOÏTA m'a chargé de transmettre ses salutations fraternelles et ses vœux de succès » au Président de la République islamique de Mauritanie. Il a conclu en exprimant sa « profonde gratitude aux autorités maliennes pour l'accueil chaleureux et l'hospitalité généreuse » qui lui ont été réservés.

KUMA FɔLɔ

Bajo aquel árbol escaso, apretujadas, dejábamos nuestras comidas, tan escasas como él, en

aquellos saquitos de tela bien atados que confeccionaban nuestras madres, aquellas que

cumplían como hombres en el campo y como mujeres cuando entraban en casa, aquellas

que a veces oías llorar a solas por amasar tan poco pan.

Los hombres se apretaban las fajas y todos comenzaban con el ritual diario de desenvainar

sus armas. Desliaban sus hoces de aquel cordel de esparto y se hacían como escudo a su mano

izquierda las toquetas, que les libraban miles de veces sus dedos de los cortes.

A mano con una hoz, una hoz cada uno y ya está. Esa es la herramienta que se usaba,

que se gastaba. Esto te libraba que te cortaras, claro, naturalmente, y cogías más cantidad

y había menos peligro de cortarse.

Yo aprendía de sus manos el quehacer y de sus milagros.

Con sus milagras infinitas, el querer afrontarlo todo.

Normalmente segábamos seis y uno ataba, siete. Y en el justo, seis hucos, el primero que va,

corta y deja a la derecha y hay dos lomos. El segundo va a izquierda y entonces el que hace siete,

ese nos siega, ata. Y a lo mejor ataba dos horas, luego se cambiaban, otro ataba y así.

Pero normalmente era una cuadrilla de seis.

Seguía uno de seis, segando y uno atando.

Había casas que participaban mujeres, niños, todos. Otros ya podían más, buscaban hombres,

una cuadrilla o dos, iban siete normalmente, segando.

Cuando el mayoral creía conveniente, siempre tarde para nosotros, llamaba a beber y parábamos un rato.

Nunca suficiente para mi hermano y para mí. Y todos los días igual.

BAMANANKAN NA

KUMA Fɔɔɔ

Bajo aquel árbol escaso, apretujadas, dejábamos nuestras comidas, tan escasas como él, en
00:08 - 00:12

aquellos saquitos de tela bien atados que confeccionaban nuestras madres, aquellas que
 00:12 - 00:17
 cumplían como hombres en el campo y como mujeres cuando entraban en casa, aquellas
 00:17 - 00:20
 que a veces oías llorar a solas por amasar tan poco pan.
 00:23 - 00:27
 Los hombres se apretaban las fajas y todos comenzaban con el ritual diario de desenvainar
 00:27 - 00:33
 sus armas. Desliaban sus hoces de aquel cordel de esparto y se hacían como escudo a su mano
 00:33 - 00:37
 izquierda las toquetas, que les libraban miles de veces sus dedos de los cortes.
 00:37 - 00:44
 A mano con una hoz, una hoz cada uno y ya está. Esa es la herramienta que se usaba,
 00:44 - 00:50
 que se gastaba. Esto te libraba que te cortaras, claro, naturalmente, y cogías más cantidad
 00:50 - 00:53
 y había menos peligro de cortarse.
 00:54 - 00:57
 Yo aprendía de sus manos el quehacer y de sus milagros.
 00:57 - 01:00
 Con sus milagras infinitas, el querer afrontarlo todo.
 01:02 - 01:11
 Normalmente segábamos seis y uno ataba, siete. Y en el justo, seis hucos, el primero que va,
 01:11 - 01:18
 corta y deja a la derecha y hay dos lomos. El segundo va a izquierda y entonces el que hace siete,
 01:19 - 01:25
 ese nos siega, ata. Y a lo mejor ataba dos horas, luego se cambiaban, otro ataba y así.
 01:25 - 01:27
 Pero normalmente era una cuadrilla de seis.
 01:27 - 01:29
 Seguía uno de seis, segando y uno atando.
 01:31 - 01:39
 Había casas que participaban mujeres, niños, todos. Otros ya podían más, buscaban hombres,
 01:40 - 01:44
 una cuadrilla o dos, iban siete normalmente, segando.
 01:50 - 01:57
 Cuando el mayoral creía conveniente, siempre tarde para nosotros, llamaba a beber y parábamos un rato.
 01:57 - 02:01
 Nunca suficiente para mi hermano y para mí. Y todos los días igual.

KUMA FɔLD

Russian Government

June 7 at 7:06 pm

Government Work. Key events and decisions of the week in the digest:

The circulation of goods and services through marketplaces and e-services already accounts for over 5% of the country's GDP. The strategic session chaired by Mikhail Mishustin discussed the progress of the creation and development of digital platforms.

Supporting regions in addressing socially significant issues is a Government priority. Dagestan and Chechnya will receive approximately 3 billion rubles for flood relief, while the Kursk and Belgorod regions have received nearly 4.5 billion rubles to assist residents forced to flee their homes. Another 2.5 billion rubles will be used to organize free hot meals and support teachers in remote areas.

New buses and trams will appear in Russian regions. Approximately 11 billion rubles will be allocated for public transportation upgrades in four regions.

Members of the Government took part in the SPIEF-2026.

Правительство России

7 June at 7:06 pm

Работа Правительства. Главные события и решения недели – в дайджесте:

Оборот товаров и услуг через маркетплейсы и электронные сервисы уже обеспечивает свыше 5% ВВП страны. На

стратегической сессии под председательством Михаила Мишустина обсудили, как идет работа по созданию и развитию цифровых платформ.

Поддержка регионов в решении социально значимых вопросов – один из приоритетов работы Правительства. Дагестан и Чечня получают около 3 млрд рублей на ликвидацию последствий наводнения, Курской и Белгородской областям направлено почти 4,5 млрд рублей на помощь жителям, вынужденным покинуть свои дома. Также 2,5 млрд рублей пойдут на организацию бесплатного горячего питания и поддержку учителей в удаленных районах.

В российских регионах появятся новые автобусы и трамваи. На обновление общественного транспорта в четырех регионах будет направлено около 11 млрд рублей.

Члены Правительства приняли участие в работе ПМЭФ-2026.

KUMA FOLD

Правительство России

7 June at 7:06 pm

Работа Правительства. Главные события и решения недели – в дайджесте:

Оборот товаров и услуг через маркетплейсы и электронные сервисы уже обеспечивает свыше 5% ВВП страны. На стратегической сессии под председательством Михаила Мишустина обсудили, как идет работа по созданию и развитию цифровых платформ.

Поддержка регионов в решении социально значимых вопросов – один из приоритетов работы Правительства. Дагестан и Чечня получают около 3 млрд рублей на ликвидацию последствий наводнения, Курской и Белгородской областям направлено почти 4,5 млрд рублей на помощь жителям, вынужденным покинуть свои дома. Также 2,5 млрд рублей пойдут на организацию бесплатного горячего питания и поддержку учителей в удаленных районах.

В российских регионах появятся новые автобусы и трамваи. На обновление общественного транспорта в четырех регионах будет направлено около 11 млрд рублей.

Члены Правительства приняли участие в работе ПМЭФ-2026.

KUMA FOLD

Today (June 10, 2026) from Zelensky's official account.

Russia launched massive drone attacks (approximately 530) and two guided missiles on 11 Ukrainian regions in less than three days, hitting:

A Panamanian-flagged container ship.

Agricultural facilities, railway lines, and power infrastructure.

Civilian residential buildings.

Dozens of civilians were injured.

The tweet includes images of actual damage in Zaporizhzhia, Kharkiv, and Chernihiv.

Context: This is part of a pattern of ongoing Russian drone and missile attacks on civilian targets and infrastructure in Ukraine. Ukraine is requesting enhanced air defenses (such as PURL) from the West.

The claims are supported by media reports and Ukrainian officials, despite the ongoing propaganda war.

Trump says: "We hit them hard yesterday, and we'll hit them hard again today... We were very close to a deal, but they're playing us like fools because they dealt with stupid presidents before."

Context (June 2026): Iran shot down a US Apache helicopter with a drone near the Strait of Hormuz This led to US strikes on Iranian targets (approximately 20 military targets such as air defense systems and radars).

The US retaliated with strikes, and Iran retaliated in turn.

This comes amid an ongoing escalation in the 2026 war between the US/Israel and Iran, following a previous fragile ceasefire.

Trump is combining military pressure with offers to negotiate on the nuclear issue.

BAMANANKAN NA

Donald J. Trump

I have just been informed by our Great Military that last night the Iranians shot down one of our highly sophisticated Apache Helicopters while patrolling over the Strait of Hormuz. There were two pilots involved, both are safe and uninjured. Nevertheless, the United States must, of necessity, respond to this attack. Thank you for your attention to this matter! President DONALD J. TRUMP

KUMA Fɔɔɔ

The China Resource Recycling Group was established in Tianjin in October 2024.

Key points:

Objective: To support green and sustainable development in China by improving the management of state-owned assets and enhancing the efficiency of material recycling.

Shareholders: The group includes major central Chinese companies such as Sinopec, Baowu, China Minmetals, China Chinalco, and others.

Business areas: * Recycling of steel, plastics, non-ferrous metals, and used batteries.

* Handling of old electronics, household appliances, and automobiles, as well as dismantling retired wind and solar power equipment.

Importance and future goals:

To enhance national security in the energy and mineral sectors.

By 2025, China aims to increase the output value of the resource recycling industry to 5 trillion yuan.

By 2030, the annual utilization of solid waste is expected to reach 4.5 billion tons.

KUMA FOLD

Republic of Turkey Presidency reposted
Recep Tayyip Erdoğan

I hope that the Antalya Diplomacy Forum, which we are organizing for the 5th time this year, will be beneficial for our region and the whole world.

I wish that the discussions, evaluations, and exchanges of ideas that will take place within the scope of the program, as well as the side events and bilateral meetings that will be held during the forum, will be fruitful.

Five years ago, we set out with the goal of creating a global platform that would take the pulse of diplomacy, and today we see that the Antalya Diplomacy Forum has become a common platform for global reason, global conscience, and hope for the future.

I believe that the discussions that will take place over three days under the theme of "Shaping Tomorrow, Managing Uncertainties" will further highlight this unique and special aspect of the forum.

I believe that the forum will contribute to Turkey's mission of being "the key to peace," and I thank each participant. #ADF2026

KUMA FOLD

Typical White House campaign/political propaganda. Trump visited a farm in Wisconsin (Chippewa Falls) on June 5, 2026, and spoke to supportive farmers under the banner "Fighting for American Farmers."

The reality on the ground: The administration spent tens of billions (such as \$12 billion in aid in 2025) as emergency support for farmers due to losses.

But the real problems persist: soaring farm bankruptcies (up 46% in 2025), rising fuel and fertilizer prices (due to tariffs/wars), labor shortages (due to immigration policies), and losses in export markets.

Farmers are struggling with high production costs, and many rely on government support (similar to Trump's first term).

The bottom line: The rhetoric is positive and targets a base in a swing state, but the data shows real difficulties in the sector despite the aid. The policies (tariffs, immigration, costs) are having a double whammy effect: some support plus some harm.

BAMANANKAN NA

Kanpapi/politiki propagande min be ke ka kepe ni White House ye. Trump taara foro do la Wisconsin (Chippewa Falls) zuwenkalo tile 5 san 2026, ka kuma senekelaw demebagaw fe ni pankarti ye min togo ye ko "Fighting for American Farmers".

Tijne min be dugukolo kan : Mara ye miliyari tan ni tan musaka ke (i n'a fo deme miliyari 12 san 2025) k'a ke deme korotlen ye senekelaw ma k'a sababu ke bone ye.

Nka geleya lakikaw be senna hali bi : forow ka banki filili minnu be ka caya (a cayara ni 46% ye san 2025), senefenw ni bagaji songo jiginni (k'a sababu ke tarifu/kelew ye), baarakelaw dese (k'a sababu ke bonchopla politiki ye), ani bone minnu be bo jamana kakan suguw la.

Senekelaw be ka geleya sɔɔ ni sene musakabaw ye, wa u caman be u jigi da gɔferenaman ka deme kan (o be tali ke Trump ka fanga faɓ la).

A kunba : Kumasan in ye kopuman ye, wa a be basigi da lapini swing cogoya la, nka kunnaƙoniw b'a jira ko geleya lakikaw be seko ni dɔnko siratige la hali ni demɛ be yen. Politikiw (tarifuw, immigration, musakaw) be ka double whammy effect sɔɔ : demɛ dɔw farala tiɲeni dɔw kan.

KUMA FOLD

Typical White House campaign/political propaganda. Trump visited a farm in Wisconsin (Chippewa Falls) on June 5, 2026, and spoke to supportive farmers under the banner "Fighting for American Farmers."

The reality on the ground: The administration spent tens of billions (such as \$12 billion in aid in 2025) as emergency support for farmers due to losses.

But the real problems persist: soaring farm bankruptcies (up 46% in 2025), rising fuel and fertilizer prices (due to tariffs/wars), labor shortages (due to immigration policies), and losses in export markets.

Farmers are struggling with high production costs, and many rely on government support (similar to Trump's first term).

The bottom line: The rhetoric is positive and targets a base in a swing state, but the data shows real difficulties in the sector despite the aid. The policies (tariffs, immigration, costs) are having a double whammy effect: some support plus some harm.

BAMANANKAN NA

Kanpani/politiki propaganda min be ke ka kepe ni White House ye. Trump taara foro do la Wisconsin (Chippewa Falls) zuwenkalo tile 5 san 2026, ka kuma senekelaw demebagaw fe ni pankarti ye min togo ye ko "Fighting for American Farmers".

Tijne min be dugukolo kan : Mara ye miliyari tan ni tan musaka ke (i n'a fo deme miliyari 12 san 2025) k'a ke deme korɔɔlen ye senekelaw ma k'a sababu ke bone ye.

KUMA Fɔɔɔ

In the United States, waste management in Tulsa is divided into two main parts:

Recycling: Recyclable materials are collected and transported to an internal sorting center called TRT, where waste is sorted and classified by type (plastic, paper, etc.) using advanced machinery.

Waste-to-Energy: Waste that cannot be recycled is transported by specialized trucks to a waste-to-energy facility to generate electricity.

KUMA Fɔɔɔ

Chinese Army Spyware

A joint military exercise between the Chinese and Mongolian armies, codenamed "Che Ming-2026," was held in Inner Mongolia (China) in late May and early June 2026.

Focus: Training to combat illegal armed groups.

More than 600 soldiers participated; this was the second iteration of the exercise, following the 2024 exercise.

Conclusion: A routine exercise to enhance cooperation between the two countries, not hostile or covert in nature.

KUMA FOLD

Russian Government

May 24, 6:11 PM

Government Work. Key events and decisions of the week in the digest:

Mikhail Mishustin spoke at the 11th CIPR-2026 conference in Nizhny Novgorod and also learned about cutting-edge developments by Russian companies at the exhibition. Over the past six years, the IT sector's share of the country's GDP has doubled, and sales of domestic software and services have grown almost 4.5-fold.

The government approved an action plan for the implementation of the Road Safety Improvement Strategy through 2030, which includes the construction of bypasses, an increase in the number of lanes, interchanges, and overpasses to relieve congestion in cities, reduce accidents, and optimize logistics.

The Prime Minister took part in a meeting of the CIS Heads of Government Council, which was held in Ashgabat. Russia's trade turnover with CIS countries increased by nearly 6.5% in January–February 2026. During his visit, Mikhail Mishustin met with the President and Chairman of the Cabinet of Ministers of Turkmenistan, Serdar Berdimuhamedov.

KUMA FOLD

Zelenskyy emphasizes that science in Ukraine focuses on protecting lives and generating innovation, awarding state prizes and honorary titles to scientists for projects in defense and medicine that strengthen the military.

He announces the launch of the National Research System this year, with monthly scholarships for 2,650 outstanding scientists, prioritizing young people, women in science, and veterans.

His participation in an event showcasing technologies such as drones underscores the collaboration between science, government, and businesses to advance air defense systems and other strategic capabilities.

BAMANANKAN NA

Zelenskyy b'a sinsin a kan ko dɔnniya min be Ukraine jamana na, o sinsinnen be jɛnamaya lakanani kan ani ka kokuradonni lase, ka jamana ka laadalata ni bonya tɔgɔw di dɔnnikelaw ma, porozew la minnu be ke lafasali ni furakeli la, minnu be sɔɔɔdasiw barika bonya.

KUMA FƊLƊ

Fishing in Mauritania can be summarized in the following key points:

Abundant Fish Stocks: The Mauritanian coastline stretches for 760 kilometers, and its shores are among the richest fishing grounds in the world thanks to the water currents that replenish the fish's biological environment. Annual fish stocks reach approximately 1.5 million tons.

Daily Activity and Exports: Despite the simplicity of the equipment and traditional fishing boats, fishermen return daily with abundant quantities of various fish species (such as caper, sardines, and others), a large portion of which is exported to neighboring countries and Europe.

Economic and Livelihood Importance: This sector represents a major resource for the Mauritanian economy. The fish market in Nouakchott sees daily visits from both locals and tourists seeking fresh fish. Most varieties are available at reasonable prices to suit everyone, with the exception of some rare species that are exported due to their high cost.

BAMANANKAN NA

Mɔni keli Moritani jamana na, o be se ka laɓe nin ƙoƙo koloma ninnu na:

KUMA FOLƁ

Fishing in Mauritania can be summarized in the following key points:

Abundant Fish Stocks: The Mauritanian coastline stretches for 760 kilometers, and its shores are among the richest fishing grounds in the world thanks to the water currents that replenish the fish's biological environment. Annual fish stocks reach approximately 1.5 million tons.

Daily Activity and Exports: Despite the simplicity of the equipment and traditional fishing boats, fishermen return daily with abundant quantities of various fish species (such as caper, sardines, and others), a large portion of which is exported to neighboring countries and Europe.

Economic and Livelihood Importance: This sector represents a major resource for the Mauritanian economy. The fish market in Nouakchott sees daily visits from both locals and tourists seeking fresh fish. Most varieties are available at reasonable prices to suit everyone, with the exception of some rare species that are exported due to their high cost.

Mali Ministry of Agriculture

OFFICIAL LAUNCH OF THE NATIONAL ENTRANCE EXAM FOR AGRICULTURAL TRAINING CENTERS (CAA), 2026 SESSION

Sunday, May 17, 2026, at the Askia Mohamed High School in Bamako.

1,026 candidates across 9 examination centers nationwide are competing for 220 available places in the 2026 session of the national entrance exam for Agricultural Training Centers (CAA).

The official launch was attended by the Minister of Agriculture, Dr. Ibrahima SAMAKE, and his colleagues from the Ministries of Livestock and Fisheries, Youba BA; National Education, Amadou SY SAVANÉ; Environment, Doumbia Mariam TANGARA; and Labor and Public Service, Fassoun COULIBALY. The first envelope containing the Writing exam paper was opened by the Minister of Agriculture, Dr. SAMAKE.

Candidates will take the Writing, Mathematics, and Biology exams in one day.

The five members of the Government offered valuable advice to the invigilators and candidates, emphasizing the importance that the highest authorities in Mali place on competitive examinations and competitions, ensuring absolute transparency and a calm atmosphere.

They also encouraged the candidates to work hard and dedicate themselves to their studies, which will ensure merit and success for future managers in the rural development sector, once they are admitted to the civil service.

As a reminder, the Agricultural Training Centers (CAA) are located in the regions of Kayes, Koulikoro, Ségou, and Koutiala.

Mali Ministère de l'Agriculture

LANCEMENT OFFICIEL DU CONCOURS NATIONAL D'ENTRÉE DANS LES CENTRES D'APPRENTISSAGE AGRICOLE CAA, SESSION 2026

Dimanche 17 mai 2026, au lycée Askia Mohamed de Bamako.

Ils sont 1026 candidats à travers 9 centres d'examens du pays, pour 220 places à pourvoir, au titre de la session 2026, du concours national d'entrée dans les CAA.

Le lancement officiel a enregistré la présence du Ministre de l'Agriculture, Dr Ibrahima SAMAKE et de ses collègues de l'Élevage et de la Pêche, Youba BA, de l'Éducation Nationale, Amadou SY SAVANÉ, de l'environnement, DOUMBIA Mariam TANGARA, et du Travail et de la Fonction Publique, Fassoun COULIBALY.

La première enveloppe contenant l'épreuve de Rédaction a été ouverte par le Ministre de l'Agriculture Dr SAMAKE.

Les candidats vont plancher sur les épreuves de Rédaction, Mathématiques et Biologie, en un jour.

Les cinq membres du Gouvernement ont prodigué de précieux conseils aux surveillants et aux candidats pour souligner toute l'importante que les plus hautes autorités du Mali, accordent aux concours et examens dans la transparence absolue et la sérénité.

Ils ont également encouragé les candidats à l'effort et au travail personnel qui assurent le mérite et le succès aux futurs agents d'encadrement du secteur du développement rural, une fois admis à la fonction publique.

Pour rappel, les Centres d'Apprentissage d'Agricole CAA, sont implantés dans les régions de Kayes, Koulikoro, Ségou et Koutiala.

KUMA FOLD

Fishing in Mauritania can be summarized in the following key points:

Abundant Fish Stocks: The Mauritanian coastline stretches for 760 kilometers, and its shores are among the richest fishing grounds in the world thanks to the water currents that replenish the fish's biological environment. Annual fish stocks reach approximately 1.5 million tons.

Daily Activity and Exports: Despite the simplicity of the equipment and traditional fishing boats, fishermen return daily with abundant quantities of various fish species (such as caper, sardines, and others), a large portion of which is exported to neighboring countries and Europe.

Economic and Livelihood Importance: This sector represents a major resource for the Mauritanian economy. The fish market in Nouakchott sees daily visits from both locals and tourists seeking fresh fish. Most varieties are available at reasonable prices to suit everyone, with the exception of some rare species that are exported due to their high cost.

KUMA Fɔɔɔ

On May 17, 2026, the first cargo plane from Hungary arrived at Constantine Airport in Algeria, carrying hundreds of sheep (approximately 400 head in this initial shipment, according to reports).

Context: This is part of a major government program ordered by President Tebboune to import one million sheep in anticipation of Eid al-Adha 2026, with the aim of increasing supply, reducing prices, and meeting demand.

Imports are primarily carried out by ship from countries such as Romania, Spain, Georgia, and others. This is the first time that air transport has been used to transport sheep specifically to Constantine.

The sheep are shown inside cages on the plane/unloading area.

Note: Despite the large-scale imports, many citizens still complain about the high prices of sacrificial animals.

The plan is ongoing to ensure their availability at reasonable prices (a proposed price ceiling of 50,000 dinars per imported sheep).

BAMANANKAN NA

KUMA FOL

May 13, 2026, in the village of Jaljulia (north/east of Ramallah, West Bank). Israeli settlers (with large flocks of sheep and goats) are seen herding livestock through the village streets, under the apparent protection of Israeli military forces (military vehicles and soldiers). The Palestinian narrative is that the settlers stole hundreds of head of livestock (a primary source of income for farmers) during an attack on the area, and a young Palestinian man was killed in related clashes.

The herding of the flocks under military protection is part of recurring incidents in the West Bank involving the theft of livestock and land. This type of incident is documented by Palestinian sources and human rights organizations, and is often denied or justified by the Israeli side as "pastoral disputes" or responses to attacks.

BAMANANKAN NA

Mekalo tile 13, san 2026, Jaljulia dugu ƙoƙo (Ramallah worodugu/ƙoƙo fe, Cisjordanie). KUMA Fɔɔɔ

This news report reviews the outcomes of the bilateral summit between former US President Donald Trump and Chinese President Xi Jinping following Trump's visit to China, highlighting the key points:

Trade Agreements: China agreed to purchase more US agricultural products, 200 Boeing aircraft, and US energy products.

Taiwan: The issue was discussed, with Trump avoiding a direct answer on whether the US would defend Taiwan militarily, while US lawmakers are pushing for a multi-billion dollar defense package for Taiwan.

Iran: The two leaders discussed the dispute with Iran (given that China is its largest trading partner), and Trump stated that he was not asking for "any favors" from China on this issue, while Iran expressed its appreciation for Chinese diplomatic support amid the ongoing dispute over uranium enrichment.

Future Steps: China described the summit as "historic," and its Foreign Ministry announced that President Xi Jinping would visit the US in the fall at Trump's invitation.

BAMANANKAN NA

KUMA Fɔɔɔ

The qualifying rounds for the National Championship in Russia, a vocational skills competition for people with disabilities and those with limited health capabilities, have begun. Key points: 2,200 competitors from all regions of Russia are participating.

The competition aims to showcase their professional abilities and connect them with the job market.

The employment rate for participants in the movement exceeds 93%.

The qualifying rounds will be held in 15 regions, covering 47 different vocational specialties.

The winners of the qualifying rounds will advance to the finals.

The championship is part of a national project to support education and employment for people with disabilities.

An official announcement from the Turkish Ministry of Agriculture and Forestry: 150 new machines and vehicles (worth approximately 2.7 billion Turkish Lira) have been delivered to the fleet of the General Directorate of Water Works in Ankara. These machines are nicknamed "Green Ants" due to their green color. They are used for: flood and disaster protection; irrigation and water infrastructure projects; and supporting agricultural operations.

Minister Ibrahim Yumakli confirmed that they contribute more than 2 billion Turkish Lira annually to the economy. The event took place two days ago.

KUMA Fɔɔɔ

Presidency of Mali

The Council of Ministers met in ordinary session on Wednesday, May 13, 2026, in its deliberation room at the Koulouba Palace, under the chairmanship of General Assimi Goita, President of the Transition, Head of State.

Here is a brief summary of the key points of the Council of Ministers' statement (May 13, 2026):

1. Institutional Aspects (Taxation):

Development of the Directorate General of Taxes through the modernization of its legislation and the strengthening of its staff over the next five years in order to improve the efficiency of tax collection.

2. Military Appointments:

Appointment of Colonel Dr. Souleymane Coulibaly as Director General of the Armed Forces Teaching Hospital.

3. Regional Cooperation (AES Sahel):

Coordination with Burkina Faso and Niger to harmonize civil aviation regulations in order to facilitate travel and economic integration among the alliance countries.

4. Rainy Season Preparations:

Launch, on May 14, of a large-scale river cleanup operation in Bamako (more than 348,000 meters) to prevent flooding.

5. Social Measures (Eid al-Adha):

Organization, from May 20 to 27 in Bamako and the provinces, of a sale of sacrificial animals at reduced prices to alleviate the financial burden on families.

6. Health and Society:

A decrease in dengue fever cases has been recorded.

The "Citizen Dialogues" project has been launched to promote the values of peace and participation among young people.

International Day of Families (May 15) was celebrated with a focus on combating drug addiction and the effects of climate change.

Russian Government

May 10 at 5:00 pm

Government Work. Key events and decisions of the week in the digest:

The science cities of Dubna and Korolev will receive funds for comprehensive development. The subsidies will be used to expand research infrastructure, modernize production facilities, and improve social services.

This year, 5.75 million children will have the opportunity to vacation in health camps. The government has expanded the list of specialists in the medical centers of children's camps. Rospotrebnadzor (Rospotrebnadzor) monitors the sanitary conditions of camps. A hotline has been created for parents to consult on choosing a camp: 8 (800) 250-28-90.

New commuter train cars will be introduced in the regions, and tickets for all routes will be available for online purchase. This is stipulated in the Concept for the Development of Suburban Passenger Rail Transport until 2035, which was approved by the Government.

According to the document, up to 7,000 units of rolling stock should be purchased by the end of 2035.

KUMA FɔLD

Presidency of Mali

The Council of Ministers met in ordinary session on Wednesday, May 13, 2026, in its deliberation room at the Koulouba Palace, under the chairmanship of General Assimi Goita, President of the Transition, Head of State.

Here is a brief summary of the key points of the Council of Ministers' statement (May 13, 2026):

1. Institutional Aspects (Taxation):

Development of the Directorate General of Taxes through the modernization of its legislation and the strengthening of its staff over the next five years in order to improve the efficiency of tax collection.

2. Military Appointments:

Appointment of Colonel Dr. Souleymane Coulibaly as Director General of the Armed Forces Teaching Hospital.

3. Regional Cooperation (AES Sahel):

Coordination with Burkina Faso and Niger to harmonize civil aviation regulations in order to facilitate travel and economic integration among the alliance countries.

4. Rainy Season Preparations:

Launch, on May 14, of a large-scale river cleanup operation in Bamako (more than 348,000 meters) to prevent flooding.

5. Social Measures (Eid al-Adha):

Organization, from May 20 to 27 in Bamako and the provinces, of a sale of sacrificial animals at reduced prices to alleviate the financial burden on families. 6. Health and Society:

A decrease in dengue fever cases has been recorded.

The "Citizen Dialogues" project has been launched to promote the values of peace and participation among young people.

International Day of Families (May 15) was celebrated with a focus on combating drug addiction and the effects of climate change.

KUMA Fɔɔɔ

Presidency of Mali

The Council of Ministers met in ordinary session on Wednesday, May 13, 2026, in its deliberation room at the Koulouba Palace, under the chairmanship of General Assimi Goita, President of the Transition, Head of State.

Here is a brief summary of the key points of the Council of Ministers' statement (May 13, 2026):

1. Institutional Aspects (Taxation):

Development of the Directorate General of Taxes through the modernization of its legislation and the strengthening of its staff over the next five years in order to improve the efficiency of tax collection.

2. Military Appointments:

Appointment of Colonel Dr. Souleymane Coulibaly as Director General of the Armed Forces Teaching Hospital.

3. Regional Cooperation (AES Sahel):

Coordination with Burkina Faso and Niger to harmonize civil aviation regulations in order to facilitate travel and economic integration among the alliance countries.

4. Rainy Season Preparations:

Launch, on May 14, of a large-scale river cleanup operation in Bamako (more than 348,000 meters) to prevent flooding.

5. Social Measures (Eid al-Adha):

Organization, from May 20 to 27 in Bamako and the provinces, of a sale of sacrificial animals at reduced prices to alleviate the financial burden on families. 6. Health and Society:

A decrease in dengue fever cases has been recorded.

The "Citizen Dialogues" project has been launched to promote the values of peace and participation among young people.

International Day of Families (May 15) was celebrated with a focus on combating drug addiction and the effects of climate change.

The term Bamanan, or "Bambara" in Morocco, refers to two things:

- 1 - Origins: They are tribes from Mali whose ancestors settled in Morocco long ago and integrated into Moroccan society.
- 2 - Art: They are associated with Gnawa music, specifically in the Merzouga region (near the village of Khamlia), where a renowned group of the same name performs melodies that blend African and Moroccan traditions.

BAMANANKAN NA

Bamanankan daɓɓe, walima "Bambara" maroko la, o be kuma fen fila de kan:

1 - Bɔɔɔɔ : U ye kabilaw ye minnu be Bɔ Mali la minnu benbaw y'u Sigi Maroc kabini kabini tuma jan, k'u Dòn Maroko jamana na.

2 - Seko ni donko : U be tali ke Gnawa foli la, kerɛnkerɛnnɛnya la Merzouga mara la (Khamlia dugu kɛɛɛɛ), yɔɔɔ min na, kulu tɔɔɔba dɔ min tɔɔɔ ye kelen ye, olu be donkiliw da minnu be Afiriki ni Maroko laadalakow fara tɔɔɔn kan.

KUMA FOLD

Government of Mali

announces an official decision regarding the implementation of a curfew in Bamako, Mali. Here are the key points to remember:

Curfew Details

Area affected: The entire territory of the Bamako district.

Hours: From 9:00 PM to 6:00 AM.

Initial duration: 72 hours, with the possibility of extension if necessary.

Effective date: April 25, 2026.

Responsibilities

The decision, made by the Governor of the Bamako district, entrusts its implementation to the following authorities:

Sub-prefects of the districts.

Mayors.

Heads of regional security services.

This is a security measure aimed at restricting nighttime movement for a specified period in the capital.

BAMANANKAN NA

KUMA Fɔɔɔ

The term Bamanan, or "Bambara" in Morocco, refers to two things:

- 1 - Origins: They are tribes from Mali whose ancestors settled in Morocco long ago and integrated into Moroccan society.
- 2 - Art: They are associated with Gnawa music, specifically in the Merzouga region (near the village of Khamlia), where a renowned group of the same name performs melodies that blend African and Moroccan traditions.

BAMANANKAN NA

Bamanankan 𐤁𐤏𐤍, walima "Bambara" maroko la, o be kuma fen fila de kan:

1 - 𐤁𐤏𐤍 : U ye kabilaw ye minnu be 𐤁𐤏 Mali la minnu benbaw y'u Sigi Maroc kabini kabini tuma jan, k'u Dòn Maroko jamana na.

2 - Seko ni 𐤁𐤏𐤍 : U be tali ke Gnawa foli la, kerɛnkerɛnnɛnya la Merzouga mara la (Khamlia dugu kerefe), 𐤏𐤍 min na, kulu 𐤁𐤏𐤍 𐤁𐤏 min 𐤁𐤏 ye kelen ye, olu be 𐤁𐤏𐤍𐤏𐤏 da minnu be Afiriki ni Maroko laadalakow fara 𐤁𐤏𐤍 kan.

KUMA ɓɓɓ

One of Morocco's most important markets... Why have sheep prices risen in the famous Fkih Ben Salah market?

May 11, 2026

The bottom line: Sheep prices have risen in the Fkih Ben Salah market (one of the largest markets in Morocco) due to increased production costs, especially feed prices, which have risen significantly (the cost of feeding one head of sheep reaches approximately 300 dirhams per month).

Quick details: Current prices: Small sheep start at approximately 2,000 dirhams, medium-sized sheep 3,000-5,000 dirhams, and premium sheep reach 8,000-10,000+ dirhams.

The main reason: Increased feed prices, plus other factors such as the previous drought, and not "the choice of livestock breeders."

The impact: A decline in demand from citizens (a noticeable reluctance) as Eid al-Adha approaches, and an increase of 300-500 dirhams compared to previous weeks. Some blame "middlemen."

BAMANANKAN NA

Maroc suguba dɔ... Munna saga sɔngɔ wulila Fkih Ben Salah sugu tɔɔɓa la?

Mekalo tile 11, san 2026

A kunba : Saga sɔngɔ wulila Fkih Ben Salah sugu la (Maroko suguba dɔ) ka da sene musakaw caya kan, kerɛnkerɛnnɛnya la balo sɔngɔ, o sɔngɔ wulila kosebe (saga kun kelen baloli musaka be se dirham 300 tɔɔ kan ma kalo kɔɔ).

Fen teliyalɛnw : Sisan sɔngɔw : Saga misɛnninw be damine dirham 2000 tɔɔ kan na, saga cemancew be damine dirham 3000-5000 tɔɔ kan na, saga premium be se dirham 8000-10000+ ma.

O kunba ye : Balo sɔngɔ jiginni, ka fara fen wɛɛw kan i n'a ɓ ja temenen, wa a te ke "baganmaralaw ka sugandili" ye.

O nɔfeko : Jamanadenw ka nininiw dɔɔɔɔɔɔɔɔ (a kɔkɔsira ko u ma ɔkɔ) ni Adha seli surunyana, ani dɔ farala dirham 300-500 kan ni i y'a suma ni dɔɔɔkɔn tɛmɛnɛnɛw ta ye. Dɔw bɛ "cɛmancelaw" jalaki.

KUMA Fɔɔɔ

The video highlights the Chinese People's Liberation Army's multi-tasking urban warfare exercises, which include the ZRY222 missile-armed unmanned ground vehicle, an eight-wheeled unmanned transport vehicle, armed/explosive robotic dogs, and reconnaissance and attack drones.

The video, broadcast by CCTV, shows People's Liberation Army soldiers and infantry training in simulated urban environments, where unmanned systems clear roads, provide fire support, and minimize personnel exposure to smoke and buildings during combat.

This reflects China's focus on military robots for complex environments like urban warfare, prioritizing easily deployable and low-cost systems that complement human forces starting in late 2025.

KUMA FOL

Mali's Agriculture: A Comprehensive Development Strategy for the Niger Office in Mali for the period 2021-2030 was presented during a meeting of the Economic, Social, and Cultural Council.

Here is a brief explanation of the key points:

1. Strategy Objectives

Achieving Food Security: The plan aims to make Mali a "breadbasket" for West Africa by increasing agricultural production, particularly rice.

Infrastructure Development: The plan includes improving irrigation canals and dams to ensure sustainable water access for farmers.

2. Key Pillars

Modernizing Agriculture: Introducing modern technologies to increase productivity and reduce waste.

Supporting Farmers: Providing fertilizers, seeds, and agricultural machinery (such as harvesters) to improve the livelihoods of those working in the sector.

Sustainable Development: Protecting water and environmental resources while expanding cultivated land.

3. Partnership and Cooperation

The Director of the Niger Office (Samba Boukary Tounkara) emphasized the importance of cooperation with the Economic Council to find solutions to the challenges facing farmers and to develop the rural sector in general.

In short: It documents an ambitious ten-year plan aimed at advancing agriculture in Mali through the development of the "Niger Office" to ensure self-sufficiency and economic growth.

KUMA Fɔɔɔ

As of early 2026, the U.S. cattle herd has dropped to 86.2 million head, the lowest level in over 75 years. Driven by persistent drought and high production costs, this historically small herd has led to record-high beef prices. Experts predict tight supplies and market volatility will continue, with herd expansion unlikely until at least 2028.

KUMA FɔLD

Presidency of Mali

Here is a clear and structured summary of the communiqué from the Council of Ministers meeting of May 6, 2026, chaired by General

Assimi Goïta.

Legislative and Regulatory Measures

The government adopted several draft texts aimed at modernizing the administration and affirming national sovereignty:

Public Procurement: Amendment of the Public Procurement Code to correct shortcomings and include expenditures from special advance payment offices within the scope of exclusions.

Decentralization: Adjustment of the transfer of powers from the State to local authorities (Municipalities, Regions, District of Bamako) following the administrative elimination of the "Circles" and the municipalities of the District of Bamako. This concerns the Industry and Trade sectors.

National Identity: Adoption of a decree for the naming of public roads and establishments. The objective is to rehabilitate illustrious historical and cultural figures of Mali in order to strengthen the national heritage.

Individual Measures (Appointments)

The Council made numerous changes, the most notable of which are:

Defense

Major General Elisée Jean DAO: Promoted to this rank on an exceptional basis and appointed Chief of the General Staff of the Armed Forces.

Territorial Administration

A large wave of appointments of Sub-Prefects was enacted throughout the country (Bamako, Lontou, Faléa, Tinzwatène, etc.), involving civil administrators as well as army and police officers (Warrant Officers).

Ministerial Offices

Justice: Bakary Soliba COULIBALY (Chief of Staff).

Energy and Water: Mohamed SOGODOGO (Chief of Staff).

Agriculture: Modibo SOGOBA (Chief of Staff).

Youth and Sports: Moussa BAMBARA (Chief of Staff).

Communications and Information

Environment: Launch on May 7, 2026, of an inter-school sanitation competition in Bamako, Kalabancoro, and Kati to promote hygiene in schools.

Health: Alert regarding an increase in dengue fever cases. The President of the Transition urged the population to strictly adhere to preventive measures.

BAMANANKAN NA

China's Ministry of Education and four other departments jointly issued the "Artificial Intelligence + Education Action Plan," aiming to coordinate and deploy talent cultivation, application innovation, infrastructure, and ecosystem construction in artificial intelligence.

Core Objectives at Each Educational Stage:

* Basic Education: Focus on offering and popularizing AI courses to cultivate students' innovative thinking.

* Higher Education: Cultivate high-end innovative talent by incorporating AI into general education courses and optimizing professional layout.

* Vocational Education: Focus on the intelligent upgrading of traditional industries, cultivating highly skilled personnel to adapt to industrial transformation.

* Lifelong Education: Develop high-quality learning resources to ensure equal access to AI learning opportunities for all.

Teacher Development and Ecosystem Construction:

* Implement the "Teacher Digital Literacy Improvement Project," conducting comprehensive training and evaluation reforms for all teachers.

* Build intelligent education platforms and infrastructure to create an innovative ecosystem for AI + education.

This plan aims to improve national literacy and promote the modernization of education by comprehensively integrating AI technology.

KUMA FOLƊ

A French news report highlights a crisis of overproduction and declining sales for some staple vegetables like leeks and potatoes in France. Here's a summary of the main points:

1. The Leek Crisis

Decline in Demand: Traders are complaining of a sharp drop in sales (reaching seven times the usual rate). The main reason is the mild weather; consumption of "vegetable soup," in which leeks are a key ingredient, decreases during the warm winter.

Overproduction: Conversely, this year's harvest was exceptionally bountiful, leaving farmers in a difficult situation.

The Necessary Solution: Farmers resorted to selling leeks at "slashed" prices (promotional offers) as low as €10 for 5 kilograms (almost half the usual price) to clear their stock before it flowered and became unsaleable.

2. The Potato Crisis

Accumulated Stock: Huge quantities of last year's harvest (around 5 tons on one farm) remain in storage until April, which is unusual.

Price Drop: Overproduction led to a price collapse, making sales unprofitable for farmers.

Food Waste: Some farmers were forced to discard half their crops, while the remaining quantities began to sproute, rendering them unsuitable for commercial sale.

Initiatives: Some farmers are giving away free bags of potatoes to their loyal customers to prevent complete spoilage and to make room for the new harvest.

Conclusion: This report reflects the challenges faced by French farmers due to climate change (warmer winters), which are affecting consumption habits and leading to financial losses and crop waste.

KUMA Fɔɔɔ

A French news report highlights a crisis of overproduction and declining sales for some staple vegetables like leeks and potatoes in France. Here's a summary of the main points:

1. The Leek Crisis

Decline in Demand: Traders are complaining of a sharp drop in sales (reaching seven times the usual rate). The main reason is the mild weather; consumption of "vegetable soup," in which leeks are a key ingredient, decreases during the warm winter.

Overproduction: Conversely, this year's harvest was exceptionally bountiful, leaving farmers in a difficult situation.

The Necessary Solution: Farmers resorted to selling leeks at "slashed" prices (promotional offers) as low as €10 for 5 kilograms (almost half the usual price) to clear their stock before it flowered and became unsaleable.

2. The Potato Crisis

Accumulated Stock: Huge quantities of last year's harvest (around 5 tons on one farm) remain in storage until April, which is unusual.

Price Drop: Overproduction led to a price collapse, making sales unprofitable for farmers.

Food Waste: Some farmers were forced to discard half their crops, while the remaining quantities began to sproute, rendering them unsuitable for commercial sale.

Initiatives: Some farmers are giving away free bags of potatoes to their loyal customers to prevent complete spoilage and to make room for the new harvest.

Conclusion: This report reflects the challenges faced by French farmers due to climate change (warmer winters), which are affecting consumption habits and leading to financial losses and crop waste.

BAMANANKAN NA

Faransi kibaruya dɔ y'a jira ko geleya dɔ be yen min be nakɔfen nafama dɔw feereli la i n'a fɔ pɔmuteri ni pɔmiteri Faransi. Nin ye hakilina kunbabaw kuncelen ye:

1. Leek ka geleya

Правительство России

26 April at 5:00 pm

Работа Правительства. Главные события и решения недели – в дайджесте:

Для многодетных семей сохранится выплата единого пособия, если среднедушевой доход в семье окажется выше регионального прожиточного минимума не более чем на 10%. Если семьи ранее получили отказ в получении пособия, Социальный фонд автоматически пересмотрит все обращения.

Расширены меры поддержки многодетных семей в области здравоохранения: они смогут получить бесплатные лекарства для детей до 6 лет не только в региональных, но и в федеральных поликлиниках, если ребенок проходит там лечение.

На следующий учебный год абитуриентам предоставят свыше 83 тыс. целевых бюджетных мест по самым востребованным специальностям: медицине, инженерии, педагогике и сельскому хозяйству. Студенты заранее смогут выбрать, где учиться и работать после выпуска, а предприятия получат необходимых им специалистов

Правительство России

26 April at 5:00 pm

Работа Правительства. Главные события и решения недели – в дайджесте:

Для многодетных семей сохранится выплата единого пособия, если среднедушевой доход в семье окажется выше регионального прожиточного минимума не более чем на 10%. Если семьи ранее получили отказ в получении пособия, Социальный фонд автоматически пересмотрит все обращения.

Расширены меры поддержки многодетных семей в области здравоохранения: они смогут получить бесплатные лекарства для детей до 6 лет не только в региональных, но и в федеральных поликлиниках, если ребенок проходит там лечение.

На следующий учебный год абитуриентам предоставят свыше 83 тыс. целевых бюджетных мест по самым востребованным специальностям: медицине, инженерии, педагогике и сельскому хозяйству. Студенты заранее смогут выбрать, где учиться и работать после выпуска, а предприятия получат необходимых им специалистов

KUMA FɔLD

Presidency of Mali

The following is a summary of the key points from the Cabinet meeting held on April 29, 2026:

1. National Mourning and Tribute

The Council paid tribute to the Minister of Defense, Sadio Camara, who died following the terrorist attacks of April 25. He was posthumously promoted to the rank of General in the Army.

2. Energy (Electricity)

Mali has secured a loan of approximately 39.5 billion CFA francs from the African Development Bank. This sum will be used to construct a 225 kV northern ring power transmission line, with the aim of stabilizing and strengthening the electricity supply in Bamako.

3. Rural Sector (Livestock and Fisheries)

National Consultations: The launch of extensive consultations from May 4 to July 29, 2026, to modernize the livestock and fisheries sectors.

International Engagement: An overview of Mali's participation in the agricultural exhibition in Morocco to improve the genetic breeds of Malian livestock.

4. Society and Health

Media: Workshops will be held (May 14-15) on the use of national languages in news coverage.

Health: A decrease in dengue fever cases has been observed, but caution is still advised.

KUMA FOLD

Presidency of Mali

The following is a summary of the key points from the Cabinet meeting held on April 29, 2026:

1. National Mourning and Tribute

The Council paid tribute to the Minister of Defense, Sadio Camara, who died following the terrorist attacks of April 25. He was posthumously promoted to the rank of General in the Army.

2. Energy (Electricity)

Mali has secured a loan of approximately 39.5 billion CFA francs from the African Development Bank. This sum will be used to construct a 225 kV northern ring power transmission line, with the aim of stabilizing and strengthening the electricity supply in Bamako.

3. Rural Sector (Livestock and Fisheries)

National Consultations: The launch of extensive consultations from May 4 to July 29, 2026, to modernize the livestock and fisheries sectors.

International Engagement: An overview of Mali's participation in the agricultural exhibition in Morocco to improve the genetic breeds of Malian livestock.

4. Society and Health

Media: Workshops will be held (May 14-15) on the use of national languages in news coverage.

Health: A decrease in dengue fever cases has been observed, but caution is still advised.

KUMA FɔLD

Presidence du Mali

Voici une explication concise des points majeurs du Conseil des Ministres du 29 avril 2026 :

1. Deuil National et Honneurs

Le Conseil a rendu hommage au Ministre de la Défense, Sadio CAMARA, décédé suite aux attaques terroristes du 25 avril. Il a été promu au grade de Général d'Armée à titre posthume.

2. Énergie (Électricité)

Le Mali a obtenu un prêt de près de 39,5 milliards de FCFA auprès de la Banque africaine de Développement (BAD). Cet argent servira à construire la Boucle Nord 225 kV pour stabiliser et renforcer l'électricité à Bamako.

3. Secteur Rural (Élevage et Pêche)

États Généraux : Lancement d'une grande concertation du 4 mai au 29 juillet 2026 pour moderniser l'élevage et la pêche.

Rayonnement international : Retour sur la participation du Mali au Salon de l'Agriculture au Maroc pour améliorer la génétique du bétail malien.

4. Société et Santé

Médias : Organisation de journées de réflexion (14-15 mai) sur l'usage des langues nationales dans l'information.

Santé : Constat d'une baisse des cas de dengue, tout en maintenant un appel à la vigilance.

KUMA FOLO

Presidence du Mali

Voici une explication concise des points majeurs du Conseil des Ministres du 29 avril 2026 :

1. Deuil National et Honneurs

Le Conseil a rendu hommage au Ministre de la Défense, Sadio CAMARA, décédé suite aux attaques terroristes du 25 avril. Il a été promu au grade de Général d'Armée à titre posthume.

2. Énergie (Électricité)

Le Mali a obtenu un prêt de près de 39,5 milliards de FCFA auprès de la Banque africaine de Développement (BAD). Cet argent servira à construire la Boucle Nord 225 kV pour stabiliser et renforcer l'électricité à Bamako.

3. Secteur Rural (Élevage et Pêche)

États Généraux : Lancement d'une grande concertation du 4 mai au 29 juillet 2026 pour moderniser l'élevage et la pêche.

Rayonnement international : Retour sur la participation du Mali au Salon de l'Agriculture au Maroc pour améliorer la génétique du bétail malien.

4. Société et Santé

Médias : Organisation de journées de réflexion (14-15 mai) sur l'usage des langues nationales dans l'information.

Santé : Constat d'une baisse des cas de dengue, tout en maintenant un appel à la vigilance.

Mali Presidency

Strategic Partnership between Russia and Mali

In light of the current crisis, Russia reaffirms its unwavering commitment to Mali. Igor Gromyko, Russia's Ambassador to Mali, emphasized the importance of strengthening the partnership between the two countries during his meeting with the President of the Transitional Government, Assimi Goïta.

Key points discussed:

Military Cooperation: Russia and its armed forces are working closely with the Malian armed forces to combat the escalating terrorist attacks in Mali.

Discussion of the Current Situation: The meeting provided an opportunity to discuss the security situation and strengthen ties of solidarity.

Diplomatic Support: The Ambassador expressed his best wishes to the Malian and Russian forces, emphasizing that Russia will remain a steadfast ally of Mali.

This meeting reflects the shared desire of both countries to consolidate their bilateral relations to address common challenges, particularly in the areas of regional security and stability.
